

Introduction

1 3D printing and nanotechnology

2 3D Bioprinting

3 3D printing and virtual augmented reality in medicine and surgery; tackling the content development barrier through co-creative approaches.

4 3D printing in pancreatic surgery

5 3D printing in Hepatobiliary Surgery

6 3D Printing in Patient obstetrics and Gynecology

7 3D printing in adult and paediatric neurosurgery: the present and the future

8 3D Printing in Dentistry with Emphasis on Prosthetic Rehabilitation and Regenerative Approaches

9 3D printing in Thoracic Surgery

9 3D printing and Plastic Surgery

10 3D Printing in Colorectal Surgery

11 3D Printing in Neurosurgery

12 3D printing and Transplantation

13 3D printing: intellectual property and innovation

13 3D printing in neurosurgery

13 3D printing and Global Surgery

13 3D printing: Future in Diagnostic and Interventional Radiology

13 3D printing and tissue engineering

15 Challenges and opportunities in 3D printing
