

Textbook Table of Contents

I. Basic Sciences of Pediatric Anesthesia

- 1. Foundations of practice*
- 2. Physiological aspects*
- 3. Anatomical considerations*
- 4. Monitoring, breathing systems and machines*

II. Pharmacology

- 1. Neonatal considerations*
- 2. Analgesics*
- 3. Hypnotics*
- 4. Muscle relaxants*
- 5. Local anesthetics*
- 6. Autonomic agents*
- 7. Vasoactive drugs*

III. Anesthetic Practice

- 8. Preoperative evaluation*
- 9. Pre-procedure medications*
- 10. Fluid and acid-base management*
- 11. Airway management*
- 12. Neurosurgical*
- 13. Ophthalmic*
- 14. Ear, nose, and throat*
- 15. Cardiovascular*
- 16. Thoracic and respiratory*

17. Abdominal and gastrointestinal

18. Renal and hepatic

19. Genitourinary

20. Orthopedic

21. Trauma and special emergencies

22. Transplant

23. Fetal surgery

IV. Procedures in pediatric anesthesia

22. Ultrasound technology

23. Advanced airway techniques

24. Intravenous access

25. Arterial access

26. Regional anesthesia: Head and neck

27. Regional anesthesia: Upper and Lower extremity

28. Regional anesthesia: Truncal blocks

29. Regional anesthesia: Neuralgic

V. Special considerations

30. Intraoperative complications

31. Ambulatory surgery practice

32. Offsite locations

33. Post anesthesia care unit

34. Critical care unit

35. Cardiopulmonary resuscitation

36. Syndromes

Video Table of Contents

1. Introduction

2. Inhalation induction

3. Parent present inhalation induction

4. Airway management

A. Nasal, Oral airway devices

B. Supraglottic airway devices

C. Standard endotracheal intubation

D. Videoscopic endotracheal intubation

E. Advanced airway techniques

5. Ultrasound technology

6. Intravenous access

A. Central venous line

B. Internal Jugular

C. Subclavian

D. Femoral

E. Peripheral venous access

F. PICC line placement

7. Arterial access

8. Upper extremity regional anesthesia

A. Interscalene brachial plexus block

B. Supraclavicular brachial plexus block

C. Infraclavicular brachial plexus block

D. Axillary brachial plexus block

E. Forearm brachial plexus blocks

F. Continuous catheter techniques

9. Lower extremity regional anesthesia

- A. Lumbar plexus*
- B. Femoral nerve block*
- C. Adductor canal*
- D. Sciatic nerve block*
- E. Ankle block*

10. Head and neck regional anesthesia

- A. Occipital nerve block*
- B. Mandibular nerve block*
- C. Maxillary nerve block*
- D. Trigeminal nerve block*
- E. Ocular nerve blocks*
- F. Cervical plexus nerve blocks*
- G. Stellate ganglion block*

11. Airway regional anesthesia

- A. Glossopharyngeal nerve block*
- B. Superior laryngeal nerve block*
- C. Recurrent laryngeal nerve block*

12. Truncal Regional anesthesia

- A. Paravertebral block*
- B. Transversus abdominis plane block*

13. Neuraxial regional anesthesia
