

***Section I: Structures & Functions of Proteins & Enzymes***

***Chapter 1: Biochemistry & Medicine***

***Chapter 2: Water & pH***

***Chapter 3: Amino Acids & Peptides***

***Chapter 4: Proteins: Determination of Primary Structure***

***Chapter 5: Proteins: Higher Orders of Structure***

***Section II: Enzymes: Kinetics, Mechanism, Regulation, & Role of Transition Metals***

***Chapter 6: Proteins: Myoglobin & Haemoglobin***

***Chapter 7: Enzymes: Mechanism of Action***

***Chapter 8: Enzymes: Kinetics***

***Chapter 9: Enzymes: Regulation of Activities***

***Chapter 10: The Biochemical Roles of Transition Metals***

***Section III: Bioenergetics***

***Chapter 11: Bioenergetics: The Role of ATP***

***Chapter 12: Biologic Oxidation***

***Chapter 13: The Respiratory Chain & Oxidative Phosphorylation***

***Section IV: Metabolism of Carbohydrates***

***Chapter 14: Overview of Metabolism & the Provision of Metabolic Fuels***

***Chapter 15: Carbohydrates of Physiological Significance***

***Chapter 16: The Citric Acid Cycle: The Central Pathway of Carbohydrate, Lipid, & Amino Acid Metabolism***

***Chapter 17: Glycolysis & the Oxidation of Pyruvate***

***Chapter 18: Metabolism of Glycogen***

***Chapter 19: Gluconeogenesis & the Control of Blood Glucose***

***Chapter 20: The Pentose Phosphate Pathway & Other Pathways of Hexose Metabolism***

***Section V: Metabolism of Lipids***

***Chapter 21: Lipids of Physiologic Significance***

***Chapter 22: Oxidation of Fatty Acids: Ketogenesis***

***Chapter 23: Biosynthesis of Fatty Acids & Eicosanoids***

***Chapter 24: Metabolism of Acylglycerols & Sphingolipids***

***Chapter 25: Lipid Transport & Storage***

***Chapter 26: Cholesterol Synthesis, Transport, & Excretion***

***Section VI: Metabolism of Proteins & Amino Acids***

***Chapter 27: Biosynthesis of the Nutritionally Nonessential Amino Acids***

***Chapter 28: Catabolism of Proteins & of Amino Acid Nitrogen***

***Chapter 29: Catabolism of the Carbon Skeletons of Amino Acids***

***Chapter 30: Conversion of Amino Acids to Specialized Products***

***Chapter 31: Porphyrins & Bile Pigments***

***Section VII: Structure, Function, & Replication of Informational Macromolecules***

***Chapter 32: Nucleotides***

***Chapter 33: Metabolism of Purine & Pyrimidine Nucleotides***

***Chapter 34: Nucleic Acid Structure & Function***

***Chapter 35: DNA Organisation, Replication, & Repair***

***Chapter 36: RNA Synthesis, Processing, & Modification***

***Chapter 37: Protein Synthesis & the Genetic Code***

***Chapter 38: Regulation of Gene Expression***

***Chapter 39: Molecular Genetics, Recombinant DNA, & Genomic Technology***

***Section VIII: Biochemistry of Extracellular & Intracellular Communication***

***Chapter 40: Membranes: Structure & Function***

***Chapter 41: The Diversity of the Endocrine System***

***Chapter 42: Hormone Action & Signal Transduction***

***Section IX: Special Topics (A)***

***Chapter 43: Nutrition, Digestion, & Absorption***

***Chapter 44: Micronutrients: Vitamins & Minerals***

***Chapter 45: Free Radicals & Antioxidant Nutrients***

***Chapter 46: Glycoproteins***

***Chapter 47: Metabolism of Xenobiotics***

***Chapter 48: Clinical Biochemistry***

***Section X: Special Topics (B)***

***Chapter 49: Intracellular Traffic & Sorting of Proteins***

***Chapter 50: The Extracellular Matrix***

***Chapter 51: Muscle & the Cytoskeleton***

***Chapter 52: Plasma Proteins & Immunoglobulins***

***Chapter 53: Red Blood Cells***

***Chapter 54: White Blood Cells***

***Section XI: Special Topics (C)***

***Chapter 55: Haemostasis & Thrombosis***

***Chapter 56: Cancer: An Overview***

***Chapter 57: The Biochemistry of Aging***

***Chapter 58: Biochemical Case Histories***
