

SECTION 1: THE GENERAL PRINCIPLES OF HISTORY TAKING AND PHYSICAL EXAMINATION

1. *The general principles of history taking*
2. *Advanced history taking*
3. *The general principles of physical examination*

SECTION 2: THE CARDIOVASCULAR SYSTEM

4. *The cardiovascular history*
5. *The cardiac examination*
6. *The lower limb examination and peripheral vascular disease*
7. *Correlation of physical signs and cardiovascular disease*
8. *A summary of the cardiovascular examination and extending the cardiovascular examination*

SECTION 3: THE RESPIRATORY SYSTEM

9. *The respiratory history*
10. *The respiratory examination*
11. *Correlation of physical signs and respiratory disease*
12. *A summary of the respiratory examination and extending the respiratory examination*

SECTION 4: THE GASTROINTESTINAL SYSTEM

13. *The gastrointestinal history*
14. *The gastrointestinal examination*
15. *Correlation of physical signs and gastrointestinal disease*
16. *A summary of the gastrointestinal examination and extending the gastrointestinal examination*

SECTION 5: THE GENITOURINARY SYSTEM

17. *The genitourinary history*
18. *The genitourinary examination*
19. *A summary of the examination of chronic kidney disease and extending the genitourinary examination*

SECTION 6: THE HAEMATOLOGICAL SYSTEM

20. *The haematological history*
21. *The haematological examination*
22. *A summary of the haematological examination and extending the haematological examination*

SECTION 7: THE RHEUMATOLOGICAL SYSTEM

- 23. *The rheumatological history*
- 24. *The rheumatological examination*
- 25. *Correlation of physical signs and rheumatological disease*
- 26. *A summary of the rheumatological examination and extending the rheumatological examination*

SECTION 8: THE ENDOCRINE SYSTEM

- 27. *The endocrine history*
- 28. *The endocrine examination*
- 29. *Correlation of physical signs and endocrine disease*
- 30. *A summary of the endocrine examination and extending the endocrine examination*

SECTION 9: THE NERVOUS SYSTEM

- 31. *The neurological history*
- 32. *The neurological examination: the cranial nerves*
- 33. *The neurological examination: speech and higher centres*
- 34. *The neurological examination: the peripheral nervous system*
- 35. *Correlation of physical signs and neurological syndromes and disease*
- 36. *A summary of the neurological examination and extending the neurological examination*
- 37. *The psychiatric history and mental health examination*

SECTION 10: SPECIALTY EXAMINATIONS

- 38. *The eyes, ears, nose and throat*
- 39. *The breasts*
- 40. *The skin, nails and lumps*
- 41. *A system for the infectious diseases examination*
- 42. *Assessment of the geriatric patient*
- 43. *Assessment of the acutely ill patient*
- 44. *Assessment of death*

SECTION 11: PAEDIATRICS

- 45. *The paediatric history and examination*
- 46. *The neonatal history and examination*

SECTION 12: GYNAECOLOGY AND OBSTETRICS

47. The gynaecological history and examination

48. The obstetric history and examination
