Preface

Part 1. History, Perspectives, Epidemiology, Diagnosis, and Classification

1. Emerging Health Perspectives

Introduction

Alcohol Use

Illicit Drug Use

Age Variations

Nonmedical Use of Prescription Drugs

Opioid Overdose Deaths

Naloxone and Opioid Overdose

Legislative, Regulatory, and Community Controls Over Opioid Prescribing

Medication-Assisted Treatment Prescription Drug and Opioid Addiction Grant

Program

Comprehensive Addiction and Recovery Act

Medication-Assisted Treatment

Social Determinants of Health

Perceived Risk of Harm With Substance Use

Facing Addiction in America: The Surgeon General's Report on Alcohol, Drugs, and Health

Screening, Brief Intervention, and Referral to Treatment

Recovery as a Holistic System

Health Insurance

2. The Epidemiology of Alcohol and Drug Disorders

What Is Epidemiology?

Substance Use in the United States: Historical Overview and Recent Prevalence

Trends

Substance Use in the United States: A Public Health Problem

When Does Use Become Pathological? Substance Abuse and Dependence

Descriptive Epidemiology: The Incidence and Prevalence of Substance Disorders

Analytic Epidemiology: The Etiology of Substance Disorders

Conclusion

3. United States Federal Drug Policy

Introduction

History

Federal Drug-Control Operations

Policymaking and Budgeting

Law Enforcement

Prevention

Treatment

Research

Issues in Policymaking

Appendix

4. Historical Perspectives of Addiction

Histories of Addiction

Brain Disease Redux

Alcohol and Other Drugs

Alcohol: Predisposed or Culturally Determined

Opiates and Other Illicit Drugs

Licit Mind-Altering Drugs

Smoking and Nicotine

Rhetoric and Reality

Taking History Seriously

5. Diagnosis and Classification of Substance Use Disorders

Introduction

The Nature of Substance Use Disorders

Substance Use Diagnoses in the DSM and ICD Systems

Practical Approaches to Diagnosis

Part 2. Behavioral Theories for Substance Use Disorder

6. Drug Reinforcement in Animals

Introduction

Assessing Reinforcing Efficacy

Progressive-Ratio Schedule

Threshold Procedure

Second-Order Schedules

Choice Procedures

Modeling Phases of Substance Use Disorder

Animal Models of Drug Use Initiation

Animal Models of Substance Use Disorder

Animal Models of Relapse

Conclusions

7. Role of Human Laboratory Studies in the Development of Medications for Alcohol and Substance Use Disorders

Introduction

Role of the Human Laboratory in Evaluating the Abuse Liability of New Medications

Issues in Human Laboratory Studies of Abuse Liability

Human Laboratory Studies of Pharmacological Agonist and Antagonist Treatments

Role of Human Laboratory Studies in Developing Medications for Alcohol Dependence

Role of the Human Laboratory in Evaluating Medications for Cocaine Dependence

Human Laboratory Studies of Medications for Amphetamine or Methamphetamine

General Conclusions Regarding Human Laboratory Studies

8. Conditioning of Addiction

Introduction

Methods for Assessing the Conditioned Effects of Drugs of Abuse in Laboratory Animals

Neural Substrates of Drug Conditioning: General Neurochemical Circuitry

Neural Substrates of Drug Conditioning: Recent Key Findings

Conclusions

9. Overlapping Striatal Circuits and Molecular Mechanisms in Rodent Models of Addiction and Depression

Overview of Striatal Circuits

Striatal Circuit Activity in Animal Models of Addiction and Depression

Molecular Mechanisms in Striatal Circuits in Addiction

Molecular Mechanisms in Striatal Circuits in Stress and Depression-Like Behavior

Conclusions

10. The Role of Endocannabinoids in Amphetamine-Driven Actions in Dopamine Neurons: Implications for Understanding and Treating Dysfunction in the Mesolimbic Circuit

Introduction

Mesolimbic Dopamine

Endocannabinoid Modulation of DA

Amphetamine

Amphetamine at Dopamine Terminals

Amphetamine at the Cell Body

Endocannabinoids and Amphetamine

Conclusions

11. Pain and Negative Affect

Pain Is a Multidimensional Experience

Chronic Pain and Negative Affect

The Vicious Cycle of Pain and Negative Affect

Comorbidity

Pain as a Negative Reward

Shared Brain Circuits

The Amygdala

Descending Pain Modulation

Corticotrigeminal Pathways

Thalamus and Cortex

A Brighter Future?

12. Genetic Vulnerability to Substance Use Disorders

Introduction

Heritability (h^2) of SUDs

Genetic Architecture of Addiction Vulnerability

An Evolutionary Perspective on Genetic Architecture of Addiction

The Genetic Architecture for Substance Dependence in Individuals

Epigenetics and Individual Differences in SUDs

Ethical Issues in High-Density Genotyping of Individuals With Substance Use Disorders

Summary and Conclusions

Glossary

13. The Assessment and Treatment of Addiction: Best Practices in a Direct-to-Consumer Age

Introduction

The Assessment

The Stages of Addiction

The Domains

The Treatment

New Frontiers

14. Metabolomics in Drug Response and Addiction

What Is Metabolomics?

Substance Abuse and Its Effect on Health and Economy

Substance Abuse Leads to Addiction

Metabolomics: The Beginning

Metabolomics in Addiction Research: Current Approach

Transcription Regulatory Network in Drug Metabolomics

Application of Metabolomics in Solving Addiction Disorders

Integration of Systems Biology to Medication Discovery

Part 3. Visualizations and Workings of the Addicted Brain

15. Neuroimaging Findings in Substance Use Disorders

Introduction

Structural Alterations

Summary of Structural Brain Findings

Dopamine and Other Neurotransmitter Systems

Summary of Neurotransmitter Findings

Functional Imaging Findings

Alcohol and Other Drug-Cue Reactivity

Conclusion

16. Neurobiological Basis of Drug Reward and Reinforcement

Introduction

Experimental Psychology Concepts of Reward and Reinforcement
Neurotransmitters and Neural Circuitry: Involvement in Different Aspects of
Reward, Reinforcement, and Addiction
Models of Drug Use and Drug Addiction
Actions of Addictive Drugs Within the Reinforcement and Reward Circuitry
What Drives Drug Use, Abuse, and Addiction: The Direction of Future Research

17. Neurobehavioral Toxicology of Substances of Abuse

Ethanol (Alcohol)

Cocaine

Amphetamine and Amphetamine-Analogs

Cathinone and Synthetic Cathinone Derivatives

Opiates

Hallucinogens

Cannabis

Nicotine

Inhalants

Barbiturates

Benzodiazepines

18. Animal Models of Substance Use Disorders: Motivational Perspective

Definitions Relevant to Animal Models

Animal Models of Withdrawal

Animal Models of Increased Drug Taking With Prolonged Access or Dependence

Protracted Abstinence

Animal Models of Dependence: Validity and Relevance to Treatment

19. Novel Methodologies: Proteomic Approaches in Substance Abuse Research

Introduction

Technology and Methods for Expression Proteomics

Implementation for Drug Abuse Studies

Conclusion

20. Neuroinflammatory Processes in Drug Addiction

Innate Immune Signaling in the Brain

Pattern Recognition Receptors and Their Ligands

Addiction as a Neuroimmune Disease

Future Immune Therapies for Addiction

Part IV. Clinical Aspects of Alcohol and Drug Addiction

21. Alcohol: Clinical Aspects

Introduction

Alcohol-Related Disorders

Age at Onset of Drinking Behavior

Effects of Ethnicity, Gender, Place of Residence, and Religion on Alcohol

Consumption

Clinical Picture

Signs and Symptoms

Psychological and Psychiatric Complications of Alcohol

Conclusions

22. Cocaine

Introduction

Cocaine Use Disorder

Intoxication

Withdrawal

Craving and Relapse

Intoxication Delirium

Cocaine-Induced Psychotic Disorder

Cocaine-Induced Anxiety Disorder

Cocaine-Induced Mood Disorder

Cocaine-Induced Sexual Dysfunction

Cocaine-Induced Sleep Disorder

23. Nicotine

Epidemiology

Biological, Behavioral, and Cognitive Aspects of Nicotine Dependence

Development of Nicotine Dependence Risk, and the Effect on Other Substance Use

Disorders

Genetics

Diagnosis

Smoking and Psychiatric Comorbidities

Prevention Science

Treatment

Summary

24. Cannabis: An Overview of the Empirical Literature

Introduction

Prevalence

Nature of Cannabis Use: Pharmacokinetics and Acute Intoxication Features

Classification of Cannabis Use Disorder

Motivational Bases of Cannabis Use

Negative Correlates of Cannabis Use and Its Disorders

Cannabis: Motivation to Quit, Reasons for Quitting, and Success in Quitting

Cannabis: Overview of Clinical Issues Relevant to Practitioners

Summary

25. Opiates and Prescription Drugs

Classification

Etiology

Epidemiology

Neurobiology

Biological Effects of Use

Psychological Effects of Use

Diagnosis

Clinical Management

Opiate Pharmacotherapy

Psychosocial Treatment

Co-occurring Psychiatric Disorders

Primary Prevention

Conclusion

26. Clinical Aspects of Methamphetamine

Introduction

Neurobiological Impact of Methamphetamine Use

Effects of Methamphetamine Use and Methamphetamine Use Disorder

Specific Populations

Reducing Harms Associated With Methamphetamine Use

Acute Management of Methamphetamine Problems

Treatment for People Who Use Methamphetamine

Future Directions in Research and Practice

27. Sedative-Hypnotics and Anxiolytics

Introduction

Intoxication and Overdose

Tolerance and Withdrawal

Substance Use Disorder

Mood and Anxiety Disorders

Cognitive Disorders

Psychotic Manifestations

Sleep Disorders

Sexual Dysfunction

Summary

Acknowledgments

28. Clinical Aspects of Inhalant Addiction

Types of Inhalants Being Abused

Epidemiology

Mechanisms of Action

Morbidity and Mortality

Psychiatric Disorders in Inhalant Users

Prevention and Management Considerations

29. Anabolic-Androgenic Steroids

Introduction

Epidemiology

Pharmacology

Patterns of Illicit Use

Adverse Medical Effects

Psychiatric Aspects and Effects

Neurobiology

Addiction

Screening and Assessment

Conclusions

30. Caffeine

Introduction

Main Sources of Caffeine and Patterns of Consumption

Pharmacology of Caffeine

Psychopharmacology of Caffeine: The Critical Processes of Caffeine Withdrawal and Withdrawal Reversal

Mental Health and Well-Being

Dietary Caffeine and Physical Health: Cardiovascular Disease

Dietary Caffeine and Physical Health: Noncardiovascular Disease

Is Caffeine Addictive and Is There a Safe Level of Consumption?

Does Caffeine Have Health Benefits?

Other Active Compounds in Caffeine Beverages

Threats to the Integrity of Caffeine Science

Public Policy and Regulation of Caffeine Exposure

Conclusions

31. Serotonergic Hallucinogens

Introduction

History

Epidemiology

Classification

Mechanism of Action

Serotonin Receptor

Indolealkylamine Hallucinogens

Phenethylamine Hallucinogens

Conclusions

32. Ketamine and Phencyclidine

Introduction

Pharmacology

Epidemiology

Use Disorders

Intoxication

Chronic Use

Addiction Treatment

part V. Behavioral Addictions and Treatment

33. The Biology and Treatment of Gambling Disorder

Introduction

The Psychiatric Nosology of Gambling Disorder

Cognitive Distortions

Prevalence Estimates and Characteristics

The Biochemistry of Gambling Disorder

The Genetics of Gambling Disorder

The Neuropsychology of Gambling Disorder

Neuroimaging Studies

Treatment

Natural Recovery

Prevention Efforts

Research Challenges and Future Directions

34. Implications of Food Addiction for Understanding and Treating Binge Eating Disorder

Introduction

History and Background

Risk Factor Similarities

Summary and Conclusions

35. Compulsive Buying

Introduction

Diagnosis and Classification

Prevalence Rates and Subject Characteristics

Economics and Consumerism

Etiology and Course

Comorbidity

Cultural Considerations

Assessment

Treatment

Future Research

36. Sexual Behavior as an Addictive or Compulsive Phenomenon

Introduction

History of Sexual Addiction and Sexually Compulsive Behavior

Sex Outside the Norm

Clinical Criteria

Etiology

Measurement

Implications for Clinical Practice

Implications for Future Research

Summary

37. New Era of Internet Addiction Research in China

Introduction

Internet and Smartphone Penetration in China

Recent Internet Addiction Research in China

National Internet Addiction Research in China

Regional Internet Addiction Research in China

Cross-Cultural Internet Addiction Research

Mediating Effects Studies in Internet Addiction Research

Internet Addiction Research in Special Groups

Methodological Approaches in Internet Addiction Research

Conclusion

38. Hoarding as a Behavioral Addiction

Overview

Classification and Comorbidity

Hoarding and Impulse Control Disorders

Hoarding and Compulsive Acquisition

Etiology/Biobehavioral Underpinnings of Hoarding

Cognitive-Behavioral Theory and Evidence

Information-Processing Deficits

Emotional Attachment to Possessions

Assessment of Compulsive Hoarding

Treatment of Compulsive Hoarding

Biological Treatments

Psychological Treatments

Conclusions

Part VI. Treatment and Application: Behavioral Treatments

39. Motivational Interviewing: Emerging Theory, Research, and Practice

What Is Motivational Interviewing?

A Brief History of MI

Theoretical Concepts and Emerging Models of MI

Defining MI

MI as an Activator of Autonomous Motivations and Growth

MI as a Method to Move People Through Stages of Change

MI as an Activator of Emotions and Openness

MI as an Interpersonal Intervention

MI as a Method to Resolve Ambivalence in the Direction of Change

MI and an Approach to Align Behavior and Values

Summary: Emerging Relational and Technical Components in a Model or Theory of MI

Evidence About MI

Evidence About MI Processes and Their Relationships With Outcomes

Other Developments in MI

Preparing Clinicians to Use MI

Summary

40. Cognitive Behavioral Therapy for Addiction

Introduction

Overview of Cognitive Behavioral Therapy

Review of Cognitive Behavioral Therapy for Stimulant Drugs

Review of Treatment for Depressant Drugs

Future Directions

41. Community Reinforcement Approach and Contingency Management Therapies

Introduction

Community Reinforcement Approach Therapy

Contingency Management Interventions

Issues Hindering the Implementation of the Community Reinforcement Approach in Practice

Issues Associated With Implementation of Contingency Management in Practice

Prize-Based Contingency Management

Cost-Effectiveness

Challenges to Dissemination

Conclusion

42. Relapse Prevention and Recycling in Addiction

Introduction

Understanding the Concept of Relapse and Its Role in Recovery

Relapse Prevention

Cognitive-Behavioral Models

Strategies for Relapse Prevention

When Relapse Prevention Fails

Treatment Recommendations

43. Brief and e-Health Interventions for the Treatment of Alcohol or Other Drug

Addiction

Drug Use and Problems

Drug Treatment in Primary Care and Nonspecialist Settings

What Is Screening and Brief Intervention?

Screening and Brief Intervention—Effectiveness and Delivery

Conclusions—Screening and Brief Interventions

Improving Compliance/Adherence to Therapies

Conclusions—Compliance Enhancement

Future Research

Resources

44. Self-Help Approaches for Addictions

Defining Self-Help

Why Use Self-Help?

Can Individuals Help Themselves?

Self-Help Drug Replacement

Bibliotherapy

Expressive Writing

Helplines

Religion, Spirituality, and Meditation

Internet Resources

Conclusions

Part VII. Treatment and Application: Group Treatments and Specific Settings

45. Community Clinics

Introduction

Literature Review Methods

History of Community Substance Abuse Treatment

A New Era Begins

Impact of the Community Mental Health Movement

Effectiveness of Community Clinic Approaches 1935–1980

Community Responses to the 1980s Cocaine Epidemic

Categories of Community Clinics

Types of Community Clinics

Interventions for Specific Populations

Use of Evidence-Based Services in Community Clinic Substance Abuse Treatment

The National Institute on Drug Abuse's National Drug Abuse Treatment Clinical

Trials Network

Drug Abuse Reporting Program Studies

Additional Treatment Models

Challenges to Community-Based Clinics

Opportunities to Expand Evidence-Based Substance Use Disorder Interventions

46. Unhealthy Alcohol and Other Drug Use in Primary Care

Introduction

Screening

Assessment

Management of Unhealthy Alcohol and Other Drug Use

Pharmacotherapy

Treatment of Psychiatric Comorbidity

Management of Withdrawal From Alcohol and Other Drugs

Medical Management (Including Preventive Care) of People With Unhealthy

Alcohol and Other Drug Use

Confidentiality

Summary and Conclusions

47. Criminal Justice System and Addiction Treatment

Introduction

Prevalence of Substance Abuse and Dependence

Substance Abuse Comorbidities

Pharmacotherapies for Substance Use

Community Corrections

Institutional Corrections

Conclusion

*48. Adolescent Neurocognitive Development and School-Based Drug Abuse
Prevention and Treatment*

Introduction

Brief Overview: Neuroscience and Adolescents

Negative Consequences of Drug Use on Teen Cognitive Function

Brain Development and School-Based Drug Use Prevention and Treatment

Schools as a Modality for Implementation of Cessation Programming

Conclusions and Future Directions

*49. The Therapeutic Community for Drug Abuse Treatment: A Journey Yet
Unfolding in the Recovery Movement*

Introduction

Origins

Early Expansion

The Formative Years

The Therapeutic Community's Coming of Age

To the 21st Century

Conclusion

50. Substance Use–Focused Mutual-Help Groups: Processes and Outcomes

Acknowledgments

Introduction

Major Types of Substance Use-Focused Mutual-Help Groups

Participation in Mutual-Help Groups and Substance Use Outcomes

Connections Between Mutual-Help Groups and Treatment

Personal Factors, Participation, and Mutual-Help Group Outcomes

Active Ingredients of Mutual-Help Groups

Conclusions

Part VIII. Treatment and Application Pharmacotherapy

51. Pharmacotherapy for Alcoholism and Some Related Psychiatric and Addictive Disorders: Scientific Basis and Clinical Findings

Introduction

Opioids: Mu Receptor Antagonist—Naltrexone

Glutamate

GABA Synthesis and Glutamate Synthesis Modulator—Gabapentin

Serotonin

Acetylcholine: Cholinergic Receptor Antagonist—Varenicline

Dopamine

Alcohol Metabolism Disruptor: Disulfiram

Potential Treatments on the Horizon

Combination Treatments

Conclusions

52. Alcohol Withdrawal: Treatment and Application

Introduction

Anticonvulsants in the Treatment of Alcohol Withdrawal

Other Anticonvulsant Agents

Alpha-2 Adrenergic Agonists

Summary and Conclusions

53. Pharmacotherapy of Cocaine Addiction

Strategies for Selecting Candidate Medications for Testing

Clinical Trials in Cocaine Addiction

Summary

54. Opioid Overdose

History

Definitions

Epidemiology

Pathophysiology

Risk Factors

Prevention

Management

Supports Following an Overdose

Conclusion

55. Methamphetamine

Mechanism of Action

Clinical Use of Methamphetamine

Diagnosis of Methamphetamine Use Disorder

Escalation of Methamphetamine Use

Pharmacokinetics of Methamphetamine

Mechanisms of Methamphetamine Reward

Human Studies in the Treatment of Methamphetamine Use Disorder

Conclusions

56. Potential Pharmacotherapies for Cannabis Dependence

Introduction

Detoxification and Relapse Prevention or Maintenance Phase

Cannabinoid Neuropharmacology

Abstinence Symptoms Treatment Medications

Relapse Prevention Medications

Future Directions in Medication Development for Cannabis Dependence

57. Hallucinogens

Historical Perspectives

Epidemiology

Basic Pharmacology

Psychological and Biological Effects

Hallucinogen Use Disorders

Hallucinogens as Treatment Tools for Addiction?

Part IX. Molecular Genetics, Alternative Therapies, and Other Topics in the

Treatment of Addiction

58. Molecular Genetics and the Treatment of Addiction

Overview

Genetics and the Treatment of Addictions

Pharmacogenetics and Pharmacogenomics

Nicotine

Alcohol

Cocaine

Opiates

An Intermediate Phenotype-Driven Pharmacogenetics Approach
Optimizing Psychosocial Treatments Through Genetics
Translating Pharmacogenetic Approaches Into Practice
Future Directions of Molecular Genetics and Addiction Treatment
Summary and Conclusions

59. Physical Considerations for Treatment Complications of Alcohol and Drug Use and Misuse

Introduction

Liver

Gut and Pancreas

Nervous System

Cardiovascular System

Oncology

Endocrinology

Nutrition and Body Composition

60. Quadruple Diagnosis: Substance Use Disorder, Comorbid Psychopathology, Human Immunodeficiency Virus Infection, and Hepatitis C Virus Infection

Introduction

Scope of the Problem

Substance Use Disorders (SUDs)

Psychiatric Disorders Other Than SUDs

Psychiatric Disorders in Human Immunodeficiency Virus Infection

Psychosocial Issues in Persons Living With HIV

Hepatitis C Virus (HCV) Infection

Stigma, HIV Infection, Hepatitis C Virus Infection, Substance Misuse and SUDs, and Other Psychiatric Disorders

Role of SUDs and Other Psychiatric Disorders in the Treatment With and Adherence to Effective ART for HIV Infection and DAAs for HCV Infection

Risk-Taking Behaviors

Assessment of the Quadruply Diagnosed

SUD Treatment of the Quadruply Diagnosed

Summary and Conclusions

61. Substance Use Stigma As a Barrier to Treatment and Recovery

Introduction

What Is Stigma?

Types and Levels of Stigma Toward Substance Abuse

The Need to Study Stigma in Context

The Impact of Stigma on Individuals With Substance Abuse Problems

Stigmatizing Attitudes and Behavior of Friends and Family

Stigma in Treatment Settings

Interventions to Reduce Stigma

Conclusions

62. Religiousness, Spirituality, and Addiction: An Evidence-Based Review

Introduction

Section I

Section II

Section III

Summary and Future Directions

Part X. Computer Modeling

63. In Silico Models of Alcohol Kinetics: A Deterministic Approach

Introduction

Mechanisms of Alcohol Intoxication

Mathematical Modeling of the Pharmacokinetics of Ethanol

In Silico Studies of Blood Ethanol Time-Concentration

Conclusion

64. In Silico Models of Alcohol Dependence Treatment: A Stochastic Approach

Introduction

Methods

Results

Conclusions

65. Dynamic and Systems-Based Models for Evaluating Hypotheses Related to

Predicting Treatment Response

Introduction

Personalized Alcoholism Treatment

Pharmacogenetics

The Johnson Model

A Dynamic Systems-Based Model

Modeling and the Personalized Treatment of Alcoholism

Conclusions

Part XI. Dependence in Specific Populations

66. Enhancing Positive Outcomes for Children of Substance-Abusing Parents

Introduction

Higher Risk for Addictions

Genetic Risks

Fetal Alcohol and Drug Exposure

The Family

Effective Prevention Programs

Programs That Increase Behavioral Control and Social Competency

Programs to Increase Emotional Resilience, Happiness, Self-Esteem, and Humor

Programs for Educational Interventions, Screening, and Referral

Summary of Recommendations for Future Research and Policy Improvements

67. Alcohol and Substance Abuse in African Americans

Introduction

Epidemiology

Preventive and Risk Factors

Impact on the Individual

Comorbidity

Treatment

Conclusions

68. Substance Use Disorders in Health Care Professionals

Introduction

Epidemiology of Alcohol and Other Drug Use by Health Care Professionals

Etiology of Substance Use Disorders in Health Care Professionals

Drug Access

Alcohol, Tobacco, and Other Drug Use in the Health Care Professions

The Intervention of Health Care Professionals

69. Identification and Treatment of Alcohol or Drug Dependence in the Elderly

Introduction

Prevalence and Impact of Substance Use Among Older Adults

Identifying Alcohol and Drug Use Problems in Older Adults

Use of Brief Alcohol Interventions With Older Adults With Substance Dependence

70. Alcohol and Drugs of Abuse in Pregnant Women: Effects on the Fetus and Newborn, Mode of Action, and Maternal Treatment

Introduction

Effects of Maternal Alcohol (Ethanol) Consumption During Pregnancy

Heroin-Dependent Mothers in Pregnancy

Effects on Postnatal Development

Mothers Using Cannabis (Marijuana, Hashish) During Pregnancy

Mothers Using Cocaine in Pregnancy

Part XII. Legal, Disability, and Rehabilitative Issues

71. Forensic Issues

Introduction

The Forensic Evaluation Process

Medical and Legal Terminology and Reports of Evaluation

Working With Attorneys: Testimony

Compulsion and Responsibility

Civil Matters

Criminal Matters

Regulatory Matters

Conclusions

72. Disability and Addiction

Introduction

Discrimination Protections for Persons With Disabilities

Key Case Law for the Americans With Disabilities Act, 1990

Americans With Disabilities Act Amendments Act of 2008

History of Entitlements for People With Disabilities and the Place for People With

Substance Use Disorders

Policy, Treatment, and Medical Coverage

Substance Use Disorders and Comorbid Disability

Conclusions

73. The Homeless

Introduction

Homelessness

Substance Use Disorders

Alcohol Use Disorder

Other Drug Use Disorders

Nonsubstance Psychiatric Disorders

Services for the Homeless

Conclusions

74. Opening New Vistas in Basic and Preclinical Addiction Research

A Retrospective View on the Hallmarks of Neurobiological Alcohol and Drug Abuse Research

New Vistas in Neurobiological Alcohol and Drug Abuse Research

New Vistas on the Genetic Level

New Vistas on the Molecular Level

New Vistas in Alcohol- and Drug-Induced Synaptic Plasticity

New Vistas on Neuronal Network Activity

Animal Brain Imaging to Identify the Neuroanatomical and Neurochemical Substrates of Addictive Behavior

New Vistas on Studying Alcohol- and Drug-Related Behaviors

Summary

75. Therapeutic Use of Noninvasive Neuromodulation for Addictions

Introduction

Neurobiology of Addiction

Noninvasive Brain Stimulation Techniques: An Overview

tES and TMS in Addictive Disorders

Safety and Tolerability

Summary and Future Directions

Part XIII: National Guidelines

Appendix 1. National Institute on Drug Abuse (NIDA): Medications to Treat Opioid Use Disorder

Appendix 2. TIP 63: Medications for Opioid Use Disorder

Appendix 3. The ASAM National Practice Guideline for the Use of Medications in the Treatment of Addiction Involving Opioid Use

Index
