

Section A. Incidentally Discovered Adrenal Mass

Case #1: 45-Year Old Woman with an Incidentally Discovered Large Adrenal Mass

Case #2: Adrenal Mass in a Patient with History of Extra-adrenal Malignancy: the Role of Imaging

Case #3: Incidentally Discovered Adrenal Mass in a Patient with History of Extra-adrenal Malignancy: the Role of Adrenal Biopsy

Case #4: Nonfunctioning Lipid Rich Adrenocortical Adenoma—Role of Follow-up

Case #5: 54-Year Old Woman with an Incidentally Discovered Adrenal Mass and Abnormal Dexamethasone Suppression Test: Role of Adrenalectomy

Case #6: Lipid Poor Adrenal Masses—The Case for Aggressive Management

Section B. Primary Aldosteronism

Case #7: Primary Aldosteronism—When Adrenal Venous Sampling is not Needed Before Unilateral Adrenalectomy

Case #8: Primary Aldosteronism with Unilateral Adrenal Nodule on Computed Tomography

Case #9: Primary Aldosteronism with Bilateral Adrenal Nodules on Computed Tomography

Case #10: Primary Aldosteronism Caused by Unilateral Adrenal Hyperplasia

Case #11: Primary Aldosteronism in a Patient with Bilateral Macronodular Adrenal Hyperplasia and Associated Clinically Important Cortisol Co-secretion

Case #12: Primary Aldosteronism in a Patient with an Adrenal Macroadenoma and Clinically Important Cortisol Co-secretion

Case #13: Primary Aldosteronism in a Patient Treated with Spironolactone

Case #14: Failed Catheterization of the Right Adrenal Vein—When Incomplete Adrenal Venous Sampling Data Can Be Used to Direct a Surgical Cure

Case #15: Primary Aldosteronism: When Adrenal Venous Sampling Shows Suppressed Aldosterone Secretion From Both Adrenal Glands

Section C. ACTH-Independent Cushing Syndrome

Case #16: 28-Year-Old Woman with Remote History of Adrenal Mass Presenting with New Onset Hypertension and Weight Gain

Case #17: 26-Year-Old Woman with a Discrepant Work-up for Cushing Syndrome Subtype

Case #18: 45-Year-Old Woman with Corticotropin-Independent Cushing Syndrome and Bilateral Adrenal Adenomas

Case #19: Corticotropin-Independent Cushing Syndrome in a Patient with “Normal” Adrenal Imaging

Case #20: 66-Year-Old Woman with Corticotropin-Independent Hypercortisolism and Bilateral Macronodular Adrenal Hyperplasia

Case #21: 35-Year-Old Woman with Low Bone Density and Fractures

Case #22: Carney Triad (Pentad) and Adrenal Adenoma with Clinically Important Cortisol Secretory Autonomy

Section D. Adrenal Cortical Carcinoma and Oncocytic Neoplasm

Case #23: Adrenal cortical carcinoma in a patient with history of adrenal incidentaloma

Case #24: Unexpected Diagnosis of Adrenal Cortical Carcinoma: Role of Urinary Steroid Profiling

Case #25: Oncocytic adrenocortical carcinoma

Case #26: Mitotane therapy in the ENSAT Stage II Adrenocortical Carcinoma

Case #27: Cortisol-Secreting Metastatic Adrenocortical Carcinoma—Role for Surgical Debulking of the Primary Tumor

Case #28: Adrenocortical Carcinoma and Severe Cushing Syndrome

Case #29: Pure Aldosterone-Secreting Adrenocortical Carcinoma

Case #30: Long-standing Primary Aldosteronism in a Patient Diagnosed with Metastatic Adrenocortical Carcinoma

Case #31: Adrenocortical Carcinoma Associated with Lynch Syndrome

Case #32: Adrenocortical Carcinoma Associated with Multiple Endocrine Neoplasia Type 1

Case #33: Adrenocortical Carcinoma Presenting with Inferior Vena Cava Thrombus

Case #34: Management of Mitotane Therapy in Adrenocortical Carcinoma

Section E. Pheochromocytoma and Paraganglioma

Case #35: Most Pheochromocytomas Grow Slowly

Case #36: The “Prebiochemical” Pheochromocytoma

Case #37: Huge Catecholamine-Secreting Tumor

Case #38: Metyrosine Use in a Patient with Metastatic Pheochromocytoma

Case #39: Pheochromocytoma in a Patient with Neurofibromatosis Type 1

Case #40: New Diagnosis of Multiple Endocrine Neoplasia Type 2A in a Patient with Bilateral Pheochromocytomas

Case #41: Pheochromocytoma in a Patient with von Hippel Lindau Disease

Case #42: Bilateral Pheochromocytoma in a Patient with MYC-associated Protein X

(MAX) Genetic Predisposition

Case #43: The Cystic Pheochromocytoma

Case #44: Skull Base and Neck Paragangliomas—Considerations for the Endocrinologist

Case #45: Cardiac Paraganglioma.

Case #46: Pheochromocytoma in Multiple Endocrine Neoplasia Type 2B

Case #47: Metastatic Paraganglioma—An Approach to Management and the Use Serial Imaging to Assess Rate of Tumor Progression

Case #48: Metastatic Pheochromocytoma—Role for 68-Ga DOTATATE PET CT

Case #49: Carney Triad (Pentad) and Catecholamine-Secreting Paragangliomas

Case #50: Metastatic Paraganglioma—Role For Systemic Chemotherapy

Case #51: Cryoablation Therapy for Metastatic Paraganglioma

Case #52: Paraganglioma in a patient with cyanotic cardiac disease

Case #53: Metastatic Paraganglioma—Role For External Beam Radiation Therapy

Section F. Corticotropin (ACTH)-Dependent Hypercortisolism

Case #54: ACTH-Dependent Cushing Syndrome can be frequently misdiagnosed

Case #55: ACTH-Dependent Cushing Syndrome—Role for Inferior Petrosal Sinus Sampling

Case #56: ACTH-Dependent Cushing Syndrome—When Inferior Petrosal Sinus Sampling is Not Needed

Case #57: Severe ACTH-Dependent Cushing Syndrome Due to a Pituitary Adenoma

Ectopic Cushing Syndrome Associated with Multiple Endocrine Neoplasia Type 2B

Case #59: Ectopic Cushing Syndrome Treated with Cryoablation

Case #60: Cyclical Ectopic Cushing Syndrome

Case #61: Mild Cushing Syndrome Associated with Ectopic Corticotropin Secretion

Case #62: Bilateral Adrenal Cryoablation in Corticotropin-dependent Cushing Syndrome

Case #63: Cushing Syndrome Associated with Ectopic Corticotropin and Corticotropin Releasing Hormone Secreting Pheochromocytoma

Case #64: Cushing Syndrome in the Setting of Multiple Endocrine Neoplasia Type 1

Section G. Other Adrenal Masses

Case #65: Adrenal Myelolipoma—A Computed Tomography Diagnosis

Case #66: Adrenal Schwannoma

Case #67: Trauma-Related Unilateral Adrenal Hemorrhage

Case #68: Bilateral Adrenal Hemorrhage

Case #69: Primary Adrenal Teratoma

Case #70: The Adrenal Stone

Case #71: Simple Adrenal Cyst

Case #72: Adrenal Cystic Lymphangioma

Case #73: Adrenal Hemangioma

Case #74: Adrenal Ganglioneuroma

Case #75: 42-Year-Old Woman with a Large Adrenal Mass

Case #76: Primary Adrenal Leiomyosarcoma

Case #77: Primary Adrenal Lymphoma

Case #78: 39-Year-Old Man with a Large Adrenal Mass

Case #79: 59-Year-Old Man with Enlarging Bilateral Adrenal Masses

Case #80: 65-Year-Old Man with Primary Adrenal Insufficiency

Case #81: 47-Year-Old Man with Primary Adrenal Insufficiency

Case #82: Bilateral Adrenal Myelolipoma—Think of Congenital Adrenal Hyperplasia

Case #83: A Unilateral Lipid Poor Adrenal Mass—An Atypical Presentation of Adrenal Histoplasmosis

Case #84: Bilateral Macronodular Adrenal Hyperplasia (BMAH) in the Setting of Multiple Endocrine Neoplasia Type 1

Case #85: Pseudo-Adrenal Masses

Section H. Adrenal and Ovarian Hyperandrogenism

Case #86: A Huge Adrenal Myelolipoma in a Patient with a Suboptimally Controlled Congenital Adrenal Hyperplasia

Case #87: Balancing Glucocorticoid and Androgen Excess in Congenital Adrenal Hyperplasia

Case #88: Dehydroepiandrosterone-sulfate (DHEA-S): The “Love it” or “Hate it” Hormone

Case #89: Sorting out the Source of Androgen Excess in a Postmenopausal Woman with an Adrenal and an Ovarian Mass

Case #90: Primary Testosterone-Secreting Adrenocortical Carcinoma in a Premenopausal Woman.

Case #91: Premenopausal Woman with Testosterone-secreting Ovarian Tumor

Case #92: Sorting out the Source of Androgen Excess in a Postmenopausal Woman with an Adrenal Mass

Case #93: Testosterone-Secreting Benign Adrenal Adenoma in a Postmenopausal Woman

Section I. Adrenal Disorders in Pregnancy

Case #94: Malignant Pheochromocytoma in Pregnancy

Case #95: Catecholamine-Secreting Paraganglioma in Pregnancy

Case #96: The Peripartum Diagnosis of Pheochromocytoma and a Genetic Mystery Solved

Case #97. History of Pregnancy in a 41-Year-Old Woman with Undiagnosed Cushing syndrome

Case #98: Pregnancy in a Patient with Primary Adrenal Insufficiency

Case #99: Pregnancy in a Patient with 21-Hydroxylase Deficiency

Case #100: Primary Aldosteronism in Pregnancy
