

## **Section 1: Principles of Critical Care**

*Chapter 1 - The Critically Ill Patient*

*Chapter 2 - The Pathophysiologic Foundations of Critical Care*

*Chapter 3 - Mechanical Ventilation*

*Chapter 4 - Hemodynamic Support in the Critically Ill Patient*

*Chapter 5 - Monitoring Organ Dysfunction in Critical Care*

*Chapter 6 - Kidney-Specific Severity Scores*

## **Section 2: Principles of Renal Physiology**

*Chapter 7 - The Physiology of the Glomerulus*

*Chapter 8 - The Physiology of the Loop of Henle*

*Chapter 9 - Glomerular Filtration Rate, Renal Functional Reserve, and Kidney Stress Testing*

*Chapter 10 - Renal Energy Consumption and Metabolism*

## **Section 3: Epidemiology of Acute Kidney Injury in Critical Care**

*Chapter 11 - Acute Kidney Injury: From Clinical to Molecular Diagnosis*

*Chapter 12 - Community- and Hospital-Acquired Acute Kidney Injury*

*Chapter 13 - Epidemiology of Acute Kidney Injury in Critically Ill Patients*

*Chapter 14 - Acute Kidney Injury in Patients With Chronic Kidney Disease*

## **Section 4: Exposures and Patient Susceptibility**

*Chapter 15 - Genetic Predisposition for Acute Kidney Injury (AKI)*

*Chapter 16 - Risk Factors and Risk Assessment in Acute Kidney Injury*

*Chapter 17 - Experimental Models of Acute Kidney Injury*

## **Section 5: Humoral and Cellular Mechanisms of Kidney Damage**

*Chapter 18 - Renal Blood Flow and Perfusion Pressure*

*Chapter 19 - Humoral Mediators in Sepsis*

*Chapter 20 - Cell Death Pathways: Apoptosis and Regulated Necrosis*

*Chapter 21 - Pathogen-Associated Molecular Patterns, Damage-Associated Molecular Patterns, and Their Receptors in Acute Kidney Injury*

## **Section 6: Clinical Course of Acute Kidney Injury and Biomarkers**

*Chapter 22 - Acute Kidney Disease*

*Chapter 23 - Acute Kidney Disease, Renal Recovery, and Post–Acute Kidney Injury Care*

*Chapter 24 - The Role of Biomarkers in the Diagnosis and Management of Acute Kidney Injury*

*Chapter 25 - Functional Biomarkers*

*Chapter 26 - Damage Biomarkers*

*Chapter 27 - Kidney Stress Biomarkers*

**Section 7: Mechanisms of Repair or Progression**

*Chapter 28 - Renal Repair and Recovery*

*Chapter 29 - Maladaptive Repair and Progression to CKD*

*Chapter 30 - Biomarkers of Recovery and/or Repair Following Acute Kidney Injury*

**Section 8: Renal Histopathology in Acute Kidney Injury**

*Chapter 31 - Practical Considerations of Renal Biopsies in Critical Care Patients*

*Chapter 32 - Localization of Injury and Repair Pathways*

**Section 9: Imaging Techniques in Critical Care Nephrology**

*Chapter 33 - Ultrasonography and Doppler Techniques*

*Chapter 34 - Contrast-Enhanced Renal Ultrasound*

*Chapter 35 - Traditional Radiology, Computed Tomography, and Magnetic Resonance Imaging in Critical Care Nephrology*

*Chapter 36 - Radionuclides Diagnostic Techniques*

**Section 10: Clinical Syndromes and Acute Kidney Injury**

*Chapter 37 - Multiple Organ Dysfunction*

*Chapter 38 - Acute Kidney Injury in Burns and Trauma*

*Chapter 39 - Drug-Induced Acute Kidney Injury*

*Chapter 40 - Acute Kidney Injury in Pregnancy*

*Chapter 41 - Acute Kidney Injury in Oncology and Tumor Lysis Syndrome*

*Chapter 42 - Acute Kidney Injury in Cardiac Surgery*

*Chapter 43 - Acute Kidney Injury in Major Surgery*

*Chapter 44 - Acute Kidney Injury in Heart Failure*

*Chapter 45 - Acute Kidney Injury in Cirrhosis*

*Chapter 46 - Acute Renal Failure in Kidney Transplant Recipients*

*Chapter 47 - Acute Glomerulonephritis*

*Chapter 48 - Contrast-Induced Acute Kidney Injury*

*Chapter 49 - Abdominal Compartment Syndrome*

*Chapter 50 - Hemolytic Uremic Syndrome*

**Section 11: Prevention and Treatment: General Treatment Concepts**

*Chapter 51 - Nonpharmacologic Management of Acute Renal Injury*

*Chapter 52 - Novel Drugs for Acute Kidney Injury*

*Chapter 53 - Remote Ischemic Preconditioning*

**Section 12: Fluid and Electrolytes**

*Chapter 54 - Blood Biochemistry: Measuring Major Plasma Electrolytes*

*Chapter 55 - Assessment of Urine Biochemistry*

*Chapter 56 - Disorders of Sodium and Water Balance*

*Chapter 57 - Disorders of Potassium and Magnesium*

*Chapter 58 - Calcium and Phosphate Physiology*

*Chapter 59 - Principles of Fluid Therapy*

*Chapter 60 - Blood Transfusion Therapy*

*Chapter 61 - Loop and Thiazide Diuretics*

*Chapter 62 - Vaptans and the Treatment of Hyponatremia*

*Chapter 63 - Aldosterone Antagonists, Amiloride, and Triamterene*

**Section 13: Acid-Base**

*Chapter 64 - Laboratory Tests: Blood Gases, Anion Gap, and Strong Ion Gap*

*Chapter 65 - Acid-Base Physiology and Diagnosis of Disorders*

*Chapter 66 - Metabolic Acidosis*

*Chapter 67 - Hyperlactatemia and Lactic Acidosis*

*Chapter 68 - Renal Tubular Acidosis*

*Chapter 69 - Metabolic Alkalosis*

*Chapter 70 - Respiratory Acid-Base Disorders*

*Chapter 71 - Iatrogenic and Poison-Derived Acid Base Disorders*

**Section 14: Metabolism and Nutrition in Critical Illness and Acute Kidney Injury**

*Chapter 72 - Energy Requirement and Consumption in the Critically Ill Patient*

*Chapter 73 - Impact of Renal Replacement Therapy on Metabolism and Nutrient Requirements in the Critically Ill Patient*

*Chapter 74 - Amino Acid Turnover, Protein Metabolism, and Nitrogen Balance in Acute Kidney Injury*

*Chapter 75 - Carbohydrates and Lipids*

*Chapter 76 - Endocrinology of the Stress Response During Critical Illness*

*Chapter 77 - Anemia of Critical Illness*

*Chapter 78 - Management of Nutrition in Acute Kidney Injury and Renal Replacement Therapy*

*Chapter 79 - Blood Glucose Control in Critical Care*

*Chapter 80 - Enteral Nutrition*

**Section 15: Infectious Diseases and Sepsis**

*Chapter 81 - Microbiologic Considerations in the Intensive Care Patient*

*Chapter 82 - Innate Immunity and the Kidney*

*Chapter 83 - Adaptive Immunity and Critical Illness*

*Chapter 84 - Spontaneous Bacterial Peritonitis and Hepatorenal Syndrome*

*Chapter 85 - Tropical Infections Causing Acute Kidney Injury*

*Chapter 86 - Sepsis and Septic Shock*

*Chapter 87 - Complement and Its Consequences in Sepsis*

*Chapter 88 - Coagulation Abnormalities in Sepsis*

*Dysfunction of the Kidney in Sepsis*

*Book chapter* [Full text access](#)

*Chapter 89 - Endothelial Dysfunction of the Kidney in Sepsis*

*Chapter 90 - Sepsis-Induced Acute Kidney Injury*

*Chapter 91 - Recommendations for Sepsis Management*

*Chapter 92 - Principles of Antimicrobial Prescription in Intensive Care Unit Patients With Acute Kidney Injury*

*Chapter 93 - Renal Replacement Therapy for Septic Acute Kidney Injury*

*Chapter 94 - Blood Purification for Sepsis*

*Chapter 95 - Management of Infection in Patients With Kidney Transplant*

*Chapter 96 - Critical Care Viral Infections*

*Chapter 97 - Principles of Antibiotic Prescription in Intensive Care Unit Patients and Patients With Acute Renal Failure*

**Section 16: Acute Intoxication and Poisoning**

*Chapter 98 - Drugs and Antidotes in Acute Intoxication*

*Chapter 99 - Extracorporeal Therapies in Acute Intoxication and Poisoning*

*Chapter 100 - Plasmapheresis in Acute Intoxication and Poisoning*

*Chapter 101 - Poisoning: Kinetics to Therapeutics*

**Section 17: Acute Kidney Injury and Organ Crosstalk**

*Chapter 102 - Bleeding and Hemostasis in Acute Renal Failure*

*Chapter 103 - Gastrointestinal Problems in Acute Kidney Injury*  
*Chapter 104 - Cardiovascular Problems in Acute Kidney Injury*  
*Chapter 105 - Water and Electrolyte Disturbances in Acute Renal Failure*  
*Chapter 106 - Neurologic Problems in Acute Renal Failure*  
*Chapter 107 - Immunologic and Infectious Complications of Acute Kidney Injury*  
*Chapter 108 - Cellular Response to Acute Kidney Injury*

**Section 18: Interaction of the Heart and the Kidney**

*Chapter 109 - Heart-Kidney Cross-Talk*  
*Chapter 110 - Classification of Cardiorenal Syndrome*  
*Chapter 111 - Cardiorenal Syndrome Type 1*  
*Chapter 112 - Cardiorenal Syndrome Type 2*  
*Chapter 113 - Cardiorenal Syndrome Type 3*  
*Chapter 114 - Cardiorenal Syndrome Type 4*  
*Chapter 115 - Cardiorenal Syndrome Type 5*  
*Chapter 116 - Renal Function During Cardiac Mechanical Support and Artificial Heart*  
*Chapter 117 - The Kidney in Diastolic Dysfunction*  
*Chapter 118 - Principles of Diuretic Management in Heart Failure*  
*Chapter 119 - Management of Overhydration in Heart Failure Patients*  
*Chapter 120 - Recent Advances for Stroke Prevention in Patients With Atrial Fibrillation and Advanced Kidney Disease*

**Section 19: Interaction of the Lung and Kidney**

*Chapter 121 - Lung-Kidney Cross-Talk*  
*Chapter 122 - The Kidney During Mechanical Ventilation*  
*Chapter 123 - Extracorporeal Membrane Oxygenation and Renal Function*  
*Chapter 124 - Extracorporeal Carbon Dioxide Removal*  
*Chapter 125 - Extracorporeal Membrane Oxygenation and Continuous Renal Replacement Therapy in Adults and Children*  
*Chapter 126 - Pulmonary-Renal Syndrome*

**Section 20: The Liver and the Kidney**

*Chapter 127 - Liver-Kidney Interaction*  
*Chapter 128 - Pathophysiology and Management of the Hepatorenal Syndrome*  
*Chapter 129 - Kidney Dysfunction After Liver Transplantation*

*Chapter 130 - Extracorporeal Liver Support Devices*

**Section 21: Interaction of the Brain and the Kidney**

*Chapter 131 - Treatment of Combined Acute Renal Failure and Cerebral Edema*

*Chapter 132 - Renal Protection in the Organ Donor*

*Chapter 133 - Effect of Extracorporeal Therapies on the Brain*

*Section 22: Fluid Balance and its Management in the Critically Ill*

*Chapter 134 - Components of Fluid Balance and Monitoring*

*Chapter 135 - Noninvasive Methods of Fluid Status Assessment in Critically Ill Patients*

*Chapter 136 - Management of Fluid Overload in Cardiorenal Patients: The Five B Approach*

*Chapter 137 - Mechanical Fluid Removal*

**Section 23: General Principles of Acute Renal Replacement Therapy**

*Chapter 138 - Indications for Renal Replacement Therapy in the Critically Ill*

*Chapter 139 - Principles of Extracorporeal Circulation and Transport Phenomena*

*Chapter 140 - Membranes and Filters for Use in Acute Renal Failure*

*Chapter 141 - Continuous Renal Replacement Therapy Machine Technology*

*Chapter 142 - Principles of Anticoagulation in Extracorporeal Circuits*

*Chapter 143 - Dialysis Solutions and Replacement Fluids*

*Chapter 144 - Starting and Stopping Renal Replacement Therapy in the Critically Ill*

*Chapter 145 - The Concept of Renal Replacement Therapy Dose and Efficiency*

*Chapter 146 - Quantification of Acute Renal Replacement Therapy*

*Chapter 147 - Principles of Pharmacodynamics and Pharmacokinetics of Drugs Used in Extracorporeal Therapies*

*Chapter 148 - Ethical Considerations in Acute Renal Replacement Therapy*

**Section 24: Intermittent Renal Replacement Therapies**

*Chapter 149 - Intermittent Techniques for Acute Dialysis*

*Chapter 150 - Solute and Water Transport in Hemodialysis: Dialyzers, Flow Distribution, and Cross-Filtration*

*Chapter 151 - Biocompatibility of the Dialysis System*

*Chapter 152 - Composition of Hemodialysis Fluid*

*Chapter 153 - Indications for and Contraindications to Intermittent Hemodialysis in Critically Ill Patients*

*Chapter 154 - Technical and Clinical Complications of Intermittent Hemodialysis in the Intensive Care Unit*

*Chapter 155 - Correction of Water, Electrolyte, and Acid-Base Derangements by Hemodialysis and Derived Techniques*

*Chapter 156 - Urea Kinetics, Efficiency, and Adequacy of Hemodialysis and Other Intermittent Treatments*

*Chapter 157 - Assessment of Fluid Status and Body Composition and Control of Fluid Balance With Intermittent Hemodialysis in the Critically Ill Patient*

*Chapter 158 - Outcomes of Intermittent Hemodialysis in Critically Ill Patients With Acute Kidney Injury*

*Chapter 159 - Hybrid Dialysis Techniques in the Intensive Care Unit*

*Chapter 160 - The Role of Plasmapheresis in Critical Illness*

*Chapter 161 - Cascade Filtration for ABO Incompatible Transplant*

*Chapter 162 - Nursing Issues and Procedures in Continuous Renal Replacement Therapy*

**Section 25: Continuous Renal Replacement Therapies (CRRT)**

*Chapter 163 - Indications for Continuous Renal Replacement Therapy: Renal Replacement Versus Renal Support*

*Chapter 164 - Beginning and Ending Continuous Renal Replacement Therapy in the Intensive Care Unit*

*Chapter 165 - Solute and Water Kinetics in Continuous Therapies*

*Chapter 166 - Continuous Renal Replacement Therapy: Modalities and Their Selection*

*Chapter 167 - Vascular Access for Acute Renal Replacement Therapy*

*Chapter 168 - Anticoagulation Strategies for Continuous Renal Replacement Therapy*

*Chapter 169 - Nursing Strategies to Prevent Coagulation of the Extracorporeal Circuit*

*Chapter 170 - Adequacy of Continuous Renal Replacement Therapy: Prescription and Delivery*

*Chapter 171 - High-Volume Hemofiltration in the Intensive Care Unit*

*Chapter 172 - Pulse High-Volume Hemofiltration in Management of Critically Ill Patients With Severe Sepsis or Septic Shock*

*Chapter 173 - High Cutoff Membranes for Mediators Removal*

*Chapter 174 - Clinical Effects of Continuous Renal Replacement Therapies*

*Chapter 175 - Antibiotic Adjustment in Continuous Renal Replacement Therapy*

*Chapter 176 - Nomenclature: Basic Principles*

*Chapter 177 - Nomenclature: Techniques*

### **Section 26: Peritoneal Dialysis in the Intensive Care Unit**

*Chapter 178 - Peritoneal Dialysis System*

*Chapter 179 - Indications, Contraindications, and Complications of Peritoneal Dialysis in Acute Renal Failure*

*Chapter 180 - Solute and Water Transport Across the Peritoneal Barrier*

*Chapter 181 - Choice of Peritoneal Dialysis Technique: Intermittent or Continuous*

*Chapter 182 - Correction of Fluid, Electrolyte, and Acid-Base Derangements by Peritoneal Dialysis in Acute Kidney Injury*

*Chapter 183 - Feasibility, Efficiency, and Adequacy of Peritoneal Dialysis in Acute Kidney Injury*

*Chapter 184 - Clinical Results and Complications of Peritoneal Dialysis in Acute Kidney Injury*

*Chapter 185 - Treatment of Peritonitis and Other Clinical Complications of Peritoneal Dialysis in the Critically Ill Patient*

*Chapter 186 - Comparison of Peritoneal Dialysis With Other Treatments for Acute Kidney Injury*

*Chapter 187 - Continuous-Flow Peritoneal Dialysis as Acute Therapy*

*Chapter 188 - Nursing and Procedure Issues in Peritoneal Dialysis*

### **Section 27: Extracorporeal Blood Purification Techniques Beyond Dialysis**

*Chapter 189 - Sorbents: From Basic Structure to Clinical Application*

*Chapter 190 - Therapeutic Apheresis in Critically Ill Patients: Indications, Modalities and Techniques, Clinical Results*

*Chapter 191 - Extracorporeal Blood Purification Techniques Beyond Dialysis: Coupled Plasmafiltration-Adsorption*

*Chapter 192 - Prometheus System*

*Chapter 193 - Toraymyxin and Other Endotoxin Adsorption Systems*

*Chapter 194 - Plasmafiltration-Adsorption-Dialysis System*

*Chapter 195 - Extracorporeal Membrane Oxygenation for Cardiac Support*

*Chapter 196 - Extracorporeal Membrane Oxygenation for Pulmonary Support*

*Chapter 197 - Cell-Based Therapies*

**Section 28: Critical Care Nephrology in Pediatrics**

*Chapter 198 - Cellular and Molecular Mechanisms of Acute Kidney Injury*

*Chapter 199 - Epidemiology of Pediatric Acute Kidney Injury*

*Chapter 200 - Treatment of Acute Kidney Injury in Children: Conservative Management to Renal Replacement Therapy*

*Chapter 201 - Technical Aspects of Pediatric Continuous Renal Replacement Therapy*

*Chapter 202 - Multiple Organ Dysfunction in the Pediatric Intensive Care Unit*

*Chapter 203 - Drug Dosing in Pediatric Acute Kidney Insufficiency and Renal Replacement Therapy*

*Chapter 204 - Nutrition of Critically Ill Children With Acute Renal Failure*

*Chapter 205 - Outcome of Pediatric Acute Kidney Injury*

*Chapter 206 - Renal Replacement Therapy for the Critically Ill Infant*

*Chapter 207 - Neonatal Hyperammonemia and Continuous Renal Replacement Therapy*

*Chapter 208 - Modified Ultrafiltration in Pediatric Heart Surgery*

*Chapter 209 - Techniques and Machines for Pediatric Renal Replacement Therapy*

*Chapter 210 - Antibiotics in Critically Ill Newborns and Children: Nephrotoxicity and Management During Renal Replacement Therapy*

**Section 29: Kidney Transplantation and Critical Care**

*Chapter 211 - Patient Selection and Pretransplantation Care for Kidney Transplant Recipients*

*Chapter 212 - Kidney Support and Perioperative Care in Kidney Transplantation*

*Chapter 213 - Acute Renal Failure in Kidney Transplant Recipients*

**Section 30: Special Kidney Problems in the Intensive Care Unit**

*Chapter 214 - Management of Chronic Kidney Disease and End-Stage Kidney Disease Patients in the Intensive Care Unit*

*Chapter 215 - Management of Patients with Diabetes in the Intensive Care Unit*

*Chapter 216 - Diagnosis and Management of Acute Kidney Injury in the  
Emergency Department*

*Chapter 217 - Anticancer Drugs and the Kidney*

*Chapter 218 - Antiinflammatory Drugs and the Kidney*

*Chapter 219 - Calcineurin Inhibitors and Other Immunosuppressive Drugs and the  
Kidney*

*Chapter 220 - Alternative Medicine and Chinese Herbs and the Kidney*

*Chapter 221 - Environment, Smoking, Obesity, and the Kidney*

*Chapter 222 - Lead and Heavy Metals and the Kidney*

*Chapter 223 - Statins and the Kidney*

*Chapter 224 - Erythropoietin Therapy in Critically Ill and Acute Kidney Injury  
Patients*

*Chapter 225 - Vasoactive Drugs, Renal Function, and Acute Kidney Injury*

*Chapter 226 - End Points for Clinical Trials in Acute Kidney Injury*

*Chapter 227 - Hypothermia and the Kidney*

*Chapter 228 - Renin-Angiotensin System Blockers and Acute Kidney Injury*
