

- 1 *Principles of Endocrinology*
- 2 *Regulation of Islet Hormone Synthesis and Secretion*
- 2 *Principles of Endocrine Measurements*
- 3 *Applications of Genetics in Endocrinology*
- 3 *Endocrine-Disrupting Chemicals and Human Disease*
- 3 *Endocrine Rhythms, the Sleep-Wake Cycle, and Biological Clocks*
- 4 *Prolactinomas and Disorders of Prolactin Secretion*
- 5 *Hypopituitarism including Growth Hormone Deficiency*
- 6 *Acromegaly*
- 7 *Development of the Pituitary*
- 7 *Cushing's Disease*
- 8 *CLINICALLY NONFUNCTIONING SELLAR MASSES*
- 9 *TSH-Producing Pituitary Tumors*
- 10 *Pituitary Surgery*
- 11 *CRANIOPHARYNGIOMAS AND PARASELLAR MASSES*
- 12 *DISORDERS OF SODIUM, DIABETES INSIPIDUS AND HYPONATRAEMIA*
- 13 *Anatomy and Physiology of the Hypothalamus and Pituitary*
- 14 *Genetic Disorders of the Pituitary*
- 15 *Aggressive Pituitary Tumors*
- 16 *Radiotherapy in Pituitary Tumors*
- 17 *Somatic Growth and Maturation: Growth hormone and Other Growth Factors*
- 18 *Growth Hormone Deficiency in Children*
- 19 *Basic and Clinical Aspects of Appetite Regulation and Energy Expenditure*
- 20 *Obesity: Risk, Risk Factors, and Medical Management*
- 21 *GENETIC OBESITY SYNDROMES*
- 22 *Regulation of Intermediary Metabolism During Fasting, Feeding, and Exercise*
- 23 *Adipose Tissue Function: Metabolic and Endocrine*
- 24 *Lipodystrophy Syndromes*
- 25 *Lipoprotein Metabolism and the Treatment of Lipid Disorders*
- 26 *Metabolic Syndrome*
- 27 *Bariatric Procedures and Operations*
- 28 *Development of the Endocrine Pancreas*
- 29 *Regulation of Islet Hormone Synthesis and Secretion*

*30 Mechanisms of Insulin Action*

*31 Classification and Diagnosis of Diabetes Mellitus*

*32 Autoimmune (Type 1) Diabetes Mellitus: Etiology, Pathogenesis, Prediction, and Prevention*

*33 Type 2 Diabetes Mellitus: Etiology, Pathogenesis, and Natural History*

*34 Diabetes Mellitus and Pregnancy*

*35 Hyperglycemia Secondary to Non-Traditional Diabetic Conditions and Therapies*

*36 Beta-cell Glucose Toxicity and Oxidative Stress*

*37 DIABETIC KETOACIDOSIS AND HYPERGLYCEMIC HYPEROSMOLAR STATE*

*38 Hypoglycemia and Hypoglycemic Syndromes*

*39 Treatment of Type 1 Diabetes Mellitus in Adults*

*40 Clinical Management of Type 2 Diabetes Mellitus*

*41 Pancreas and Islet Transplantation*

*42 Diabetes and Long-Term Complications*

*43 Diabetic Eye Disease*

*44 Diabetic Neuropathy*

*45 Glucose Sensors and Insulin Pumps*

*45 Diabetic Kidney Disease*

*46 Diabetic Foot and Vascular Complications*

*47 Parathyroid Hormone and the Parathyroid Hormone Receptor Type 1 in the Regulation of Calcium and Phosphate Homeostasis and Bone Metabolism*

*48 Parathyroid Hormone-Related Protein*

*49 Calcitonin*

*50 Vitamin D: From Photosynthesis, Metabolism, and Action to Clinical Applications*

*51 Bone Development and Remodeling*

*52 Regulation of Calcium Homeostasis and Genetic Disorders that Affect Calcium Metabolism*

*53 Genetic Disorders of Phosphate Homeostasis*

*54 Primary Hyperparathyroidism*

*55 Hypercalcemia of Malignancy*

*56 Surgical Management of Hyperparathyroidism*

*57 PSEUDOHYPOPARATHYROIDISM, ALBRIGHT'S HEREDITARY OSTEODYSTROPHY, AND PROGRESSIVE OSSEOUS HETEROPLASIA: DISORDERS CAUSED BY GNAS MUTATIONS THAT*

*REDUCE Gsa ACTIVITY*

*58 Genetic Defects in Vitamin D Metabolism and Action*

*59 Hereditary Disorders of the Skeleton*

*60 Osteoporosis*

*61 CKD-MBD Syndrome: Chronic Kidney Disease Produced Disorders in Skeletal, Vascular, and Cardiac Tissues and Mineral Metabolism*

*62 Disorders of Mineralization*

*63 Paget's Disease of Bone*

*64 Anatomy and Development of the Thyroid*

*65 Thyroid-Stimulating Hormone and TSH Receptor*

*66 Thyroid Hormone Transporters and Metabolism*

*67 Thyroid Hormone Action*

*68 Thyroid Function Testing (TSH, T3, and T4)*

*69 Thyroid Imaging*

*70 Pathology of the Thyroid Gland*

*71 Graves' Disease*

*72 Graves' Orbitopathy*
