

## **VOLUME I**

### **Part 1: Structure and Function of Bone, Joints, and Connective Tissue**

**1. Biology of the Normal Joint, 1**

*Carla R. Scanzello and Steven R. Goldring*

**2. Synovium, 20**

*Douglas J. Veale and Gary S. Firestein*

**3. Cartilage and Chondrocytes, 34**

*Ali Mobasher, Mary B. Goldring, and Richard F. Loeser*

**4. Biology, Physiology, and Morphology of Bone, 60**

*Aline Bozec, Anika Grüneboom, and Georg Schett*

**5. Muscle: Anatomy, Physiology, and Biochemistry, 67**

*Mark S. Miller, Edward P. Debold, and Michael J. Toth*

**6. Biomechanics, 80**

*Kenton R. Kaufman and KaiNan An*

**7. Regenerative Medicine and Tissue Engineering, 92**

*Frank P. Luyten, Cosimo De Bari, and Francesco Dell'Accio*

**8. Proteinases and Matrix Degradation, 109**

*Yoshifumi Itoh*

### **Part 2: Cells Involved in Autoimmune Diseases and Inflammation**

**9. Dendritic Cells, 132**

*Mansi Saxena, Nicolas Vabret, Luciana Ribeiro Muniz, and Nina Bhardwaj*

**10. Mononuclear Phagocytes, 149**

*Deborah R. Winter, Anna Montgomery, and Harris Perlman*

**11. Neutrophils, 161**

*Binita Shah, Nathalie Burg, and Michael H. Pillinger*

**12. T Lymphocytes, 182**

*Ralph C. Budd*

**13. B Cells, 199**

*Yong-Rui Zou, Christine Grimaldi, and Betty Diamond*

**14. Fibroblasts and Fibroblast-like Synoviocytes, 222**

*Christopher D. Buckley and Andrew Filer*

**15. Mast Cells, 241**

*Peter A. Nigrovic*

**16. Innate Lymphoid Cells and Natural Killer Cells, 254**

*Michael A. Paley and Wayne M. Yokoyama*

**17. Platelets and Megakaryocytes, 262**

*Eric Boilard and Peter A. Nigrovic*

**Part 3: Effector Mechanisms in Autoimmunity and Inflammation**

**18. Principles of Signaling, 273**

*Abel Suarez-Fueyo, Vaishali R. Moulton, and George C. Tsokos*

**19. The Immunologic Repercussions of Cell Death, 286**

*Helen M. Beere and Douglas R. Green*

**20. Innate Immunity, 306**

*Gregoire Lauvau and Steven A. Porcelli*

**21. Adaptive Immunity, 320**

*Martha S. Jordan and Gary A. Koretzky*

**22. Autoimmunity and Tolerance, 337**

*Dwight H. Kono and Argyrios N. Theofilopoulos*

**23. The Microbiome in Health and Disease, 355**

*Rob Knight*

**24. Metabolic Regulation of Immunity, 368**

*Ruoning Wang, Tingting Wang, and Stephen Tait*

**25. Genetics of Rheumatic Diseases, 378**

*Stephen Eyre and Anne Barton*

**26. Epigenetics of Rheumatic Diseases, 393**

*Amr H. Sawalha and Matlock A. Jeffries*

**27. Complement System, 409**

*V. Michael Holers and Leendert A. Trouw*

**28. Prostaglandins, Leukotrienes, and Related Compounds, 420**

*Robert B. Zurier*

**29. Chemokines and Cellular Recruitment, 437**

*Gerard Graham*

**30. Angiogenesis, 445**

*Ursula Fearon, Zoltán Szekanecz, and Douglas J. Veale*

**31. Cytokines, 455**

*Iain B. McInnes*

**32. Experimental Models for Rheumatoid Arthritis, 467**

*Rikard Holmdahl*

**33. Neuronal Regulation of Pain and Inflammation, 480**

*Camilla I. Svensson and Linda S. Sorkin*

**Part 4: Broad Issues in the Approach to Rheumatic Disease**

**34. Clinical Research Methods in Rheumatic Disease, 495**

*Jeffrey R. Curtis, Yvonne M. Golightly, and Kenneth G. Saag*

**35. Economic Impact of Arthritis and Rheumatic Conditions, 510**

*Louise B. Murphy*

**36. Assessment of Health Outcomes, 522**

*Dorcas E. Beaton, Maarten Boers, Peter Tugwell, and Lara Maxwell*

**37. Biomarkers in Rheumatology, 536**

*Michael J. Townsend, Saloumeh K. Fischer, and Andrew C. Chan*

**38. Occupational and Recreational Musculoskeletal Disorders, 551**

*Richard S. Panush*

**39. Cardiovascular Risk in Inflammatory Rheumatic Disease, 563**

*Cynthia S. Crowson, Sherine E. Gabriel, and Anne Grete Semb*

**40. Cancer Risk in Rheumatic Diseases, 579**

*Eric L. Matteson*

**41. Introduction to Physical Medicine and Rehabilitation, 592**

*Sara J. Cuccurullo, Jaclyn Joki, and Ofure Luke*

**42. Pregnancy and Rheumatic Diseases, 604**

*Lisa R. Sammaritano and Bonnie L. Bermas*

**Part 5: Evaluation of Generalized and Localized Symptoms**

**43. History and Physical Examination of the Musculoskeletal System, 621**

*John M. Davis III, Kevin G. Moder, and Gene G. Hunder*

**44. Ultrasound in Rheumatology, 638**

*Eugene Y. Kissin, Paul J. DeMarco, and Amy C. Cannella*

**45. Evaluation of Monoarticular and Polyarticular Arthritis, 663**

*Ronald F. van Vollenhoven*

**46. Skin and Rheumatic Diseases, 678**

*David F. Fiorentino and Victoria P. Werth*

**47. The Eye and Rheumatic Diseases, 702**

*James T. Rosenbaum*

**Part 6: Differential Diagnosis of Regional and Diffuse Musculoskeletal Pain**

**48. Neck Pain, 711**

*Jennifer Kosty, Rani Nasser, Raul A. Vasquez, Cyrus C. Wong, and Joseph S. Cheng*

**49. Shoulder Pain, 727**

*Scott David Martin and Thomas S. Thornhill*

**50. Low Back Pain, 753**

*Rajiv Dixit*

**51. Hip and Knee Pain, 776**

*James I. Huddleston, III, and Stuart Goodman*

**52. Foot and Ankle Pain, 792**

*Christopher P. Chiodo, Mark D. Price, and Adam P. Sangeorzan*

**53. Hand and Wrist Pain, 800**

*Kenneth W. Donohue, Felicity G. Fishman, and Carrie R. Swigart*

**54. Temporomandibular Joint Pain, 813**

*Daniel M. Laskin*

**55. Fibromyalgia, 825**

*Leslie J. Crofford*

**Part 7: Diagnostic Tests and Procedures in Rheumatic Diseases**

**56. Synovial Fluid Analyses, Synovial Biopsy, and Synovial Pathology, 841**

*Hani S. El-Gabalawy and Stacy Tanner*

**57. Arthrocentesis and Injection of Joints and Soft Tissues, 859**

*Ahmed S. Zayat, Andrea di Matteo, and Richard J. Wakefield*

**58. Anti-nuclear Antibodies, 875**

*Stanford L. Peng and Joseph E. Craft*

**59. Autoantibodies in Rheumatoid Arthritis, 890**

*Erika Darrah, Antony Rosen, and Felipe Andrade*

**60. Acute Phase Reactants, 907**

*Rebecca Haberman, Cesar E. Fors Nieves, Bruce N. Cronstein, and Amit Saxena*

**61. Imaging in Rheumatic Diseases, 920**

*Mikkel Østergaard, Ho Jen, Jacob L. Jaremko, and Robert G.W. Lambert*

**Part 8: Pharmacology of Anti-rheumatic Drugs**

**62. Therapeutic Targeting of Prostanoids, 965**

*Leslie J. Crofford*

**63. Glucocorticoid Therapy, 985**

*Marlies C. van der Goes and Johannes W.G. Jacobs*

**64. Traditional DMARDs: Methotrexate, Lefl, Sulfasalazine, Hydroxychloroquine, and Combination Therapies, 1007**

*Amy C. Cannella and James R. O'Dell*

**65. Immunosuppressive Drugs, 1031**

*Jacob M. van Laar*

**66. Anti-cytokine Therapies, 1046**

*Katharine McCarthy, Arthur Kavanaugh, and Christopher T. Ritchlin*

**67. Cell-Targeted Biologics and Emerging Targets: Rituximab, Abatacept, and Other Biologics, 1068**

*Peter C. Taylor*

**68. Intra-cellular Targeting Agents in Rheumatic Disease, 1091**

*Virginia Reddy and Stanley Cohen*

**69. Urate-Lowering Therapy, 1111**

*Ted R. Mikuls*

**70. Bisphosphonates, 1125**

*Arthur C. Santora II and Kenneth G. Saag*

**71. Analgesic Agents in Rheumatic Disease, 1135**

*Gregory R. Polston and Mark S. Wallace*

**72. Nutrition and Rheumatic Diseases, 1156**

*Lisa K. Stamp and Leslie G. Cleland*

**73. Evaluation and Management of Early Undifferentiated Arthritis, 1173**

*Karim Raza*

**VOLUME II**

**Part 9: Rheumatoid Arthritis**

**74. Etiology of Rheumatoid Arthritis, 1181**

*Gary S. Firestein*

**75. Pathogenesis of Rheumatoid Arthritis, 1200**

*Gary S. Firestein*

**76. Clinical Features of Rheumatoid Arthritis, 1236**

*Bryant R. England and Ted R. Mikuls*

**77. Treatment of Rheumatoid Arthritis, 1258**

*James R. O'Dell*

**78. Sjögren's Syndrome, 1284**

*E. William St. Clair and David L. Leverenz*

**Part 10: Spondyloarthritis**

**79. Etiology and Pathogenesis of Spondyloarthritis, 1307**

*Keith A. Sikora and Robert A. Colbert*

**80. Ankylosing Spondylitis and Other Forms of Axial Spondyloarthritis, 1319**

*Sjef van der Linden, Matthew Brown, Lianne S. Gensler, Tony Kenna, Walter P. Maksymowych, and William J. Taylor*

**81. Reactive Arthritis, 1344**

*John D. Carter and Alan P. Hudson*

**82. Psoriatic Arthritis, 1359**

*Oliver FitzGerald and Conor Magee*

**83. Inflammatory Bowel Disease–Associated Arthritis and Other Enteropathic Arthropathies, 1381**

*Richard Zamore, Meenakshi Bewtra, and Alexis Ogdie*

**Part 11: Systemic Lupus Erythematosus and Related Syndromes**

**84. Etiology and Pathogenesis of Systemic Lupus Erythematosus, 1396**

*Mary K. Crow*

**85. Clinical Features of Systemic Lupus Erythematosus, 1413**

*Maria Dall'Era and David Wofsy*

**86. Treatment of Systemic Lupus Erythematosus, 1437**

*Antonios Fanouriakis, George Bertsias, and Dimitrios T. Boumpas*

**87. Antiphospholipid Syndrome, 1460**

*Medha Barbhaiya, Jane E. Salmon, and Doruk Erkan*

**Part 12: Systemic Sclerosis, Inflammatory Myopathies, and Overlap Syndromes**

**88. Etiology and Pathogenesis of Systemic Sclerosis, 1473**

*John Varga*

**89. Clinical Features and Treatment of Scleroderma, 1499**

*Fredrick M. Wigley and Francesco Boin*

**90. Inflammatory Diseases of Muscle and Other Myopathies, 1539**

*Kanneboyina Nagaraju, Rohit Aggarwal, and Ingrid E. Lundberg*

**91. Overlap Syndromes, 1569**

*Jonathan Graf*

**Part 13: Vasculitis**

**92. Classification and Epidemiology of Systemic Vasculitis, 1584**

*Rennie L. Rhee and Peter A. Merkel*

**93. Giant Cell Arteritis, Polymyalgia Rheumatica, and Takayasu's Arteritis, 1595**

*David B. Hellmann*

**94. Anti-neutrophil Cytoplasmic Antibody– Associated Vasculitis, 1617**

*Sharon A. Chung and Paul A. Monach*

**95. Polyarteritis Nodosa and Related Disorders, 1634**

*Raashid Luqmani and Abid Awisat*

**96. Immune Complex–Mediated Small Vessel Vasculitis, 1649**

*John H. Stone*

**97. Primary Angiitis of the Central Nervous System, 1659**

*Rula A. Hajj-Ali and Carol A. Langford*

**98. Behçet's Disease, 1666**

*Christine S. Ahn, Lindsay C. Strowd, and Joseph L. Jorizzo*

**Part 14: Crystal-Induced and Inflammasome- Mediated Inflammation**

**99. Pathogenesis of Inflammasome-Mediated Diseases, 1676**

*Hal M. Hoffman and Lori Broderick*

**100. Etiology and Pathogenesis of Hyperuricemia and Gout, 1687**

*Robert T. Keenan, Michael Toprover, and Michael H. Pillinger*

**101. Clinical Features and Treatment of Gout, 1710**

*Nicola Dalbeth*

**102. Calcium Crystal Disease: Calcium Pyrophosphate Dihydrate and Basic Calcium Phosphate, 1732**

*Robert Terkeltaub*

**103. Familial Autoinflammatory Syndromes, 1752**

*Catharina M. Mulders-Manders, Anna Simon, and Jos W.M. van der Meer*

**Part 15: Cartilage, Bone, and Heritable Connective Tissue Disorders**

**104. Pathogenesis of Osteoarthritis, 1770**

*Paul E. Di Cesare, Dominik R. Haudenschild, Steven B. Abramson, and Jonathan Samuels*

**105. Clinical Features of Osteoarthritis, 1789**

*Amanda E. Nelson*

**106. Treatment of Osteoarthritis, 1803**

*Devyani Misra, Deepak Kumar, and Tuhina Neogi*

**107. Metabolic Bone Disease, 1819**

*Nancy E. Lane*

**108. Proliferative Bone Diseases, 1839**

*Reuven Mader*

**109. Osteonecrosis, 1852**

*Christopher Chang, Adam Greenspan, and M. Eric Gershwin*

**110. Relapsing Polychondritis, 1876**

*Gaye Cunnane*

**111. Heritable Diseases of Connective Tissue, 1886**

*Deborah Krakow*

**Part 16: Rheumatic Diseases of Childhood**

**112. Etiology and Pathogenesis of Juvenile Idiopathic Arthritis, 1905**

*Edward M. Behrens*

**113. Clinical Features and Treatment of Juvenile Idiopathic Arthritis, 1911**

*Joyce J. Hsu, Tzielan C. Lee, and Christy I. Sandborg*

**114. Childhood-Onset Systemic Lupus Erythematosus, Drug-Induced Lupus in Children, and Neonatal Lupus, 1931**

*Stacy P. Ardoin and Fatima Barbar-Smiley*

**115. Juvenile Dermatomyositis, Scleroderma, Vasculitis, and Autoimmune Brain Disease, 1942**

*Angela B. Robinson, Jeffrey Dvergsten, Kathryn S. Torok, Heather Van Mater, William Gallentine, and Ann M. Reed*

**Part 17: Infection and Arthritis**

**116. Bacterial Arthritis, 1979**

*Paul P. Cook and Dawd S. Siraj*

**117. Lyme Disease, 1994**

*Linda K. Bockenstedt*

**118. Mycobacterial Infections of Bones and Joints, 2009**

*Eric M. Ruderman and John P. Flaherty*

**119. Fungal Infections of Bones and Joints, 2022**

*Eric M. Ruderman and John P. Flaherty*

**120. Rheumatic Manifestations of HIV Infection, 2033**

*Jonathan Dau and John D. Reveille*

**121. Viral Arthritis, 2048**

*Philippe Gasque and Xavier Guillot*

**122. Rheumatic Fever and Post-streptococcal Arthritis, 2061**

*Luiza Guilherme, Pedro Ming Azevedo, and Jorge Kalil*

**Part 18: Arthritis Accompanying Systemic Disease**

**123. Amyloidosis, 2077**

*Helen J. Lachmann and Faye A. Sharpley*

**124. Sarcoidosis, 2088**

*Peter Korsten, Nadera J. Sweiss, and Robert P. Baughman*

**125. Hemochromatosis, 2105**

*Gaye Cunnane*

**126. Hemophilic Arthropathy, 2115**

*Astrid E. Pulles, Lize F. D. van Vulpen, and Floris P.J.G. Lafeber*

**127. Rheumatic Manifestations of Hemoglobinopathies, 2127**

*Carlos J. Lozada and Elaine C. Tozman*

**128. IgG4-Related Disease, 2135**

*John H. Stone and Shiv Pillai*

**129. Arthritis Accompanying Endocrine and Metabolic Disorders, 2149**

*Sebastian E. Sattui and Joseph A. Markenson*

**130. Rheumatic Paraneoplastic Syndromes—Links Between Malignancy and Autoimmunity, 2161**

*Bernhard Manger and Georg Schett*

**131. Tumors and Tumor-like Lesions of Joints and Related Structures, 2167**

*Darcy A. Kerr and Andrew E. Rosenberg*

**132. Autoimmune Complications of Immune Checkpoint Inhibitors for Cancer, 2189**

*Laura C. Cappelli, Clifton O. Bingham III, and Ami A. Shah*
