

Part One

1. *Requests for Pathologic Evaluation*
2. *Specimen Processing: From Gross Specimens to Tissue Cassettes*
3. *The Histology Laboratory—What the Pathologist Needs to Know—From Tissue Cassettes to Glass Slides*
4. *The Surgical Pathology Report: From the Glass Slide to the Final Diagnosis*
5. *Special Studies*
6. *Occupational Hazards*
7. *Microscopy and Photography*

Part Two

8. *Adrenal Gland*
9. *Amputations and Large Resections*
10. *Small Biopsies*
11. *Bone and Joints*
12. *Breast*
13. *Cardiovascular Specimens*
14. *Cytology Specimens*
15. *Dermatopathology*
16. *Gastrointestinal Specimens*
17. *Genitourinary Specimens*
18. *Gross Examination*
19. *Gynecologic and Perinatal Pathology*
20. *Head and Neck and Laryngeal Specimens*
21. *Hernia Sac*
22. *Lung and Pleura*
23. *Lymph Nodes, Spleen, and Bone Marrow*
24. *Medical Devices and Foreign Material*
25. *Neuropathology*
26. *Paraganglioma*
27. *Penis*
28. *Soft Tissue Tumors (Sarcomas)*
29. *Thymus*

30. *Thyroid and Parathyroid Glands*
