

- 1 Neurophysiology of the Spinal Cord
- 2 Physiology and Pathophysiology
- 3 Epidemiology, Risk Factors and Genetics
- 4 Prevention of Spinal Cord Injury
- 5 Clinical and basic research
- 6 Section 2: Acute Injury Assessment and Care
- 6 Prehospital Evaluation and Management
- 7 Critical Care Management
- 7 Neurological Assessment and Classification
- 8 Medical and Surgical Options Management of Acute Spinal cord Injury
- 8 Neuroimaging
- 9 Electrodiagnostics in Spinal Cord Injury
- 10 Functional Assessment
- 11 Prognosis and Outcome Management
- 12 Cardiovascular Management
- 13 Autonomic Dysreflexia
- 14 Section 3 : Medical Management
- 14 Pulmonary
- 15 Sleep disorders in Individuals with Spinal Cord Injury
- 16 Thromboembolism/DVT
- 17 Neurogenic Bowel
- 18 DYSPHAGIA AFTER SPINAL CORD INJURY
- 19 Neurogenic Bladder
- 20 UROLOGICAL CONDITIONS IN PERSONS WITH SPINAL CORD INJURED
- 21 Sexuality/ Reproductive
- 22 WOMEN'S HEALTH AFTER SCI
- 23 Musculoskeletal Pain and Overuse Injuries

24 Heterotopic Ossification

25 Spine Fractures, Dislocations, and Instability

26 Scoliosis and Late Spine complications

27 Spinal Orthosis

28 POSTTRAUMATIC SYRINGOMYELIA

29 Spasticity

30 Thermoregulation and Sweating

31 TBI and SCI

32 Neuromodulatory and dis-modifying agents

33 Pressure Injuries

34 Nutrition, weight management and body composition

35 Endocrine / Metabolic

36 Infection. Immune NOS

37 Pain

38 Psychological

39 Traumatic Myelopathy

40 NON TRAUMATIC MYELOPATHIES

41 SECTION 4: Myelopathy

41 Myelopathy without specified etiology

42 Healthcare maintenance

43 Spinal Cord Injury and Aging

44 SECTION 5: Long-Term Management and Outcomes

44 Exercise and modalities

45 FUNCTIONAL MOBILITY FOLLOWING SPINAL CORD INJURY

46 Activities of daily living

47 COMMUNICATION AND SCI

48 PARTICIPATION: LIVING WITH SCI
