

## *CONTENTS*

- Contributors vii*
- Series Foreword ix*
- Preface xi*
- Chapter 1 Basics of Nuclear Medicine Physics and Radiation Safety 1*
- The Atomic Structure 1*
- Radioactive decay 1*
- Isomeric transition 2*
- Positron decay 2*
- Electron capture 2*
- Characteristic X-rays 3*
- Radioactivity 3*
- Universal decay table 3*
- Radioactivity Equilibrium 4*
- Interaction of radiation with matter 4*
- Radiation safety 5*
- Radiation exposure limits 5*
- Release of patients following I-131 therapy 6*
- Radiation Safety Fundamentals 6*
- Radiation monitoring 6*
- Radiation exposure to pregnant personnel 6*
- Area designation and posting 6*
- Controlled area 6*
- Restricted area 6*
- Radiation area 7*
- High radiation area 7*
- Radioactive materials 7*
- Ordering, receipt, and disposal of radioactive materials 7*
- Radiation safety surveys 7*
- Waste disposal 7*
- Spill of radioactive materials 8*
- Minor spills 8*

<i>Major spills</i>	8
<i>Medical events</i>	8
<i>Chapter Self-Assessment Questions</i>	9
<i>Chapter 2 Basics of Radiochemistry</i>	11
<i>Introduction</i>	11
<i>Basic Concepts of Radionuclide</i>	11
<i>Atomic nucleus</i>	11
<i>Forces in the nucleus</i>	12
<i>Isotopes and radioactive decay</i>	12
<i>xiv Contents</i>	
<i>Interaction of radiation with matter</i>	12
<i>Production of radionuclides</i>	13
<i>Basic Concepts of Radiolabeling</i>	13
<i>Isotopic labeling</i>	13
<i>Nonisotopic labeling</i>	13
<i>Specific activity</i>	13
<i>Radiochemistry for positron emission tomography tracers</i>	14
<i>Radionuclide selection</i>	14
<i>Radiochemistry with positron emission tomography radionuclides</i>	14
<i>Radiolabeling with F-18</i>	14
<i>Nucleophilic reactions</i>	14
<i>Electrophilic reactions</i>	16
<i>Radiolabeling using prosthetic agents</i>	16
<i>Automation radiosynthesis</i>	16
<i>Radiolabeling with C-11</i>	17
<i>Radiolabeling with other positron emission tomography radionuclides</i>	17
<i>Radiopharmaceuticals</i>	18
<i>Quality Control of Radiopharmaceuticals</i>	18
<i>Chapter Self-Assessment Questions</i>	21
<i>Chapter 3 Basics of Instrumentation</i>	22
<i>Introduction</i>	22
<i>Gas detectors</i>	22
<i>Geiger–Muller survey meters</i>	23

*Scintillation detectors* 25  
*Pulse height analyzer* 26  
*Gamma cameras* 26  
*Collimator geometry* 27  
*Scintillation crystal* 28  
*Photomultiplier tubes* 28  
*Energy and position logic computer* 28  
*Single-photon emission computed tomography* 28  
*Single-photon emission computed tomography image quality* 28  
*Positron emission tomography* 29  
*Problems with reconstruction of positron emission tomography images* 29  
*Positron emission tomography/computed tomography instrumentation* 30  
*Time of flight positron emission tomography/computed tomography* 31  
*Chapter Self-Assessment Questions* 32  
*Chapter 4 Thyroid Imaging and Therapy* 34  
*Introduction* 34  
*Hyperthyroidism* 34  
*Background* 34  
*General diagnostic and treatment algorithm* 34  
*Role of nuclear imaging* 34  
*Radioiodine therapy* 36  
*Side effects and radiation precautions* 37  
*Thyroid Cancer* 37  
*Background* 37  
*Treatment overview* 37  
*Role of nuclear imaging and therapy* 40  
Contents xv  
*Radioiodine scans* 41  
*Radioiodine therapy* 42  
*Post-therapy scans* 43  
*Side effects and radiation precautions* 43  
*Non-iodine avid disease* 43  
*Conclusion* 44

<i>Chapter Self-Assessment Questions</i>	46
<i>Chapter 5 Parathyroid Scintigraphy</i>	48
<i>Background</i>	48
<i>Parathyroid scintigraphy</i>	48
<i>Chapter Self-Assessment Questions</i>	53
<i>Chapter 6 Neuroendocrine Tumor Imaging and Therapy</i>	55
<i>Introduction</i>	55
<i>Background</i>	55
<i>Somatostatin receptors</i>	55
<i>Somatostatin receptor imaging</i>	56
<i>Somatostatin receptor therapy</i>	57
<i>Clinical Trials of Peptide Receptor Radionuclide Therapy</i>	57
<i>Phase I or II experience</i>	57
	177
<i>Lu-Dotatate Therapy</i>	58
<i>Patient selection</i>	58
<i>Future directions and controversies</i>	60
<i>Performing the therapy</i>	63
<i>Efficacy</i>	64
<i>Neuroblastoma</i>	64
<i>Pheochromocytoma or paraganglioma</i>	64
<i>Medullary thyroid cancer</i>	64
<i>Conclusion</i>	64
<i>Chapter Self-Assessment Questions</i>	67
<i>Chapter 7 Central Nervous System</i>	68
<i>Introduction</i>	68
<i>Clinical Applications</i>	68
<i>Cerebrospinal fluid flow imaging</i>	68
<i>Brain death</i>	69
<i>Epilepsy</i>	70
<i>Movement disorders</i>	70
<i>Cerebrovascular disease</i>	71

<i>Parametric brain SPECT or PET mapping</i>	72
<i>Chapter Self-Assessment Questions</i>	77
<i>Chapter 8 Bone Scintigraphy</i>	78
<i>Introduction</i>	78
<i>Normal Biodistribution</i>	78
<i>Clinical Applications</i>	78
<i>Bone vascularity and viability</i>	79
<i>Prosthesis evaluation</i>	80
<i>xvi Contents</i>	
<i>Metabolic bone disease</i>	80
<i>Malignant disease</i>	82
<i>Extra-Osseous Uptake</i>	83
<i>Chapter Self-Assessment Questions</i>	84
<i>Chapter 9 Infection and Inflammation</i>	85
<i>Introduction</i>	85
<i>Basic principles of imaging labeled white blood cell scintigraphy</i>	85
<i>Basic principles of imaging FDG</i>	86
<i>Clinical imaging strategies in selected clinical settings</i>	87
<i>Systemic infection and inflammation</i>	87
<i>Localized or organ specific infection and inflammation</i>	89
<i>Novel and future aspects</i>	92
<i>Nuclear medicine aspects of COVID-19</i>	92
<i>Chapter Self-Assessment Questions</i>	97
<i>Chapter 10 Cardiovascular Nuclear Medicine</i>	99
<i>Myocardial Function</i>	99
<i>Myocardial perfusion</i>	100
<i>Myocardial Viability</i>	103
<i>Infective, Inflammatory, and Deposition-Related Conditions</i>	104
<i>Chapter Self-Assessment Questions</i>	108
<i>Chapter 11 Pulmonary Scintigraphy</i>	109
<i>Introduction</i>	109
<i>Clinical Aspects of Pulmonary Embolism</i>	109
<i>Overall Imaging Strategies in Pulmonary Embolism</i>	110

*Practical Aspects of V/Q Scan* 110

*Interpretation of V/Q Scintigraphy—Pulmonary Embolism or No Pulmonary Embolism* 111

*Non-Pulmonary Embolism Use* 113

*Take Home Points* 114

*Chapter Self-Assessment Questions* 115

*Chapter 12 Gastrointestinal & Hepatobiliary Scintigraphy* 116

*Gastrointestinal Functional Studies* 116

*Gastric Emptying Scintigraphy* 116

*Scintigraphic Principle* 116

*General Study Protocol* 117

*Interpretation and Reporting* 117

*Gastroesophageal Reflux and Pulmonary Aspiration* 117

*Scintigraphic principle* 118

*General study protocol* 118

*Interpretation and reporting* 118

*Small Bowel and Colon Transit Studies* 118

*Procedure* 118

*Protocols* 118

*Image analysis* 119

*Salivary Gland Function* 120

*Protocol* 122

*Applications* 122

*Contents* xvii

*Meckel's Scintigraphy* 123

*Scintigraphic principle* 123

*General study protocol* 123

*Interpretation and reporting* 124

*Biliary Acid Recirculation* 124

*Scintigraphic principle* 124

*General study protocol* 124

*Protein-losing Enteropathy* 124

*Scintigraphic principle* 124

*General study protocol* 125  
*Interpretation and reporting* 125  
*Gastrointestinal Bleeding Scintigraphy* 125  
*Scintigraphic principle* 126  
*General study protocol* 126  
*Interpretation and reporting* 126  
*Hepatobiliary and splenic scintigraphy* 127  
*Cholescintigraphy* 127  
*Radiopharmaceuticals* 128  
*Indications* 128  
*Contraindications* 128  
*General study protocol* 128  
*Postprandial epigastric pain* 128  
*Postsurgical complications* 129  
*Biliary atresia* 130  
*Choledochal cysts* 131  
*Liver function and surgical planning pre-liver resection* 131  
*Liver Assessment Before Selective Internal Radiation Therapy* 132  
*Other applications* 132  
*Splenic Scintigraphy* 133  
*Indications* 133  
*Protocol* 133  
*Acknowledgment* 134  
*Chapter Self-Assessment Questions* 135  
*Chapter 13 Renal Scintigraphy* 136  
*Radiopharmaceuticals* 136  
*Technetium-99m diethylenetriaminepentaacetic acid* 136  
*Iodine-131 orthoiodohippurate* 136  
*Technetium-99m mercaptoacetyltriglycine* 136  
*Technetium-99m dimercaptosuccinic acid* 136  
*Fluorine-18 fluorodeoxyglucose* 137  
*Normal Renal Function* 137

*Clinical Applications* 137

*Renal failure* 137

*Renal infection* 137

*Renal obstructive disease* 138

*Renovascular disease* 139

*Renal transplant assessment* 139

*Renal Cancer* 140

*Chapter Self-Assessment Questions* 142  
*xviii Contents*

*Chapter 14 Positron Emission Tomography (PET), PET/CT, and PET/MRI* 143

*Introduction* 143

*Radiopharmaceuticals and instrumentation* 143

*Positron emission tomography radiopharmaceuticals* 146

*Technical considerations* 148

*Other positron emission tomography radiopharmaceuticals in oncologic applications* 150

*Myocardial perfusion positron emission tomography tracers* 151

*Clinical applications in oncology* 152

*Genitourinary malignancies* 157

*Prostate* 158

*Breast cancer* 159

*Cardiology applications* 163

*NeuroPET* 164

*Interictal seizure localization* 165

*Summary* 168

*Chapter Self-Assessment Questions* 178

*Chapter 15 Lymphoscintigraphy* 179

*Lymphoscintigraphy Principles* 179

*Cancer lymphatic drainage* 180

*Lymphedema* 180

*Reverse Lymphatic Mapping* 180

*Chapter Self-Assessment Questions* 183

*Chapter 16 Radio-Theranostics* 184

<i>Introduction</i>	184
<i>Radio-theranostic pairs</i>	184
<i>Pseudo–radio-theranostic pairs</i>	185
<i>Radio-theranostics in the clinic</i>	187
<i>Summary</i>	192
<i>Chapter Self-Assessment Questions</i>	194
<i>Chapter 17 Essentials of Pediatric Nuclear Medicine</i>	195
<i>Introduction</i>	195
<i>Radiopharmaceutical Dosage and Radiation Dose</i>	195
<i>Distraction Techniques, Sedation, and General Anesthesia</i>	196
<i>Thyroid</i>	196
<i>Congenital hypothyroidism</i>	196
<i>Graves' disease</i>	200
<i>Differentiated thyroid cancer</i>	200
<i>Urinary Tract</i>	202
<i>Congenital anomalies of the kidneys and urinary tracts</i>	202
<i>Dimercaptosuccinic Acid</i>	213
<i>Voiding cystography</i>	213
<i>Hepatobiliary System and Spleen</i>	215
<i>Neonatal biliary atresia</i>	215
<i>Other pediatric-specific hepatobiliary and splenic pathologies</i>	215
<i>Gastrointestinal Tract</i>	216
<i>Contents</i>	xix
<i>Gastroesophageal reflux scintigraphy, gastric emptying scintigraphy, and radionuclide salivagram</i>	216
<i>Ectopic gastric mucosa in a Meckel diverticulum</i>	219
<i>Musculoskeletal System</i>	221
<i>Bone stress injuries: Stress reactions and stress fractures</i>	221
<i>Back pain and spondylolysis</i>	221
<i>Non-accidental trauma</i>	223
<i>Complex regional pain syndrome</i>	229
<i>Functional Imaging in Pediatric Oncology</i>	229
<i>Metaiodobenzylguanidine in neuroblastoma</i>	229

<i>18F-FDG PET/CT in pediatric neoplasms</i>	232
<i>Infection and Inflammation</i>	232
<i>Central Nervous System</i>	239
<i>Epilepsy</i>	239
<i>Nuclear medicine cerebrospinal fluid shunts</i>	239
<i>Conclusion</i>	239
<i>Chapter Self-Assessment Questions</i>	247
<i>Chapter 18 Quality Assurance of Nuclear Medicine Instrumentation</i>	248
<i>Introduction</i>	248
<i>Gamma Camera Uniformity Test</i>	248
<i>Resolution and Linearity</i>	249
<i>Center of rotation</i>	249
<i>SPECT system performance evaluation</i>	249
<i>Quality assurance of CT scanners</i>	249
<i>Quality assurance of PET scanners</i>	250
<i>Blank scans</i>	250
<i>Normalization scans</i>	250
<i>Radioactivity concentration calibration</i>	250
<i>PET/CT performance evaluation</i>	251
<i>Summary of Quality Assurance of Nuclear Medicine Instrumentation</i>	251
<i>Chapter Self-Assessment Questions</i>	252
<i>Chapter 19 Nuclear Medicine Procedures in the Pregnant and Lactating Patient</i>	
<i>Introduction</i>	253
<i>What Are the Risks of Radiation in Pregnancy?</i>	253
<i>Recommendations regarding fetal radiation exposure</i>	253
<i>Radiopharmaceutical distribution and dosimetry in the pregnant patient</i>	253
<i>Imaging for suspected pulmonary embolism in pregnancy</i>	255
<i>Radioiodine distribution and dosimetry in the pregnant patient</i>	257
<i>Example Cases of</i>	
<i>131</i>	
<i>I Treatments in Pregnant Patients from the United States</i>	

*Nuclear Regulatory Commission Office of Nuclear Material Safety  
and Safeguards* 258

*Decision-Making Regarding Imaging with Radiopharmaceuticals in  
the Pregnant Patient* 260

*Radioisotopes and the lactating patient* 260

*Chapter Self-Assessment Questions* 264

*Index* 267
