

SECTION I

Foundations and Principles of Palliative Care in Oncology

- 1 Definition of Palliative Care
- 2 Introduction to Prognostication
- 3 Basic Communication Frameworks
- 4 Troubleshooting Difficult Conversation
- 5 Models of Multidisciplinary Management

SECTION II

Techniques and Modalities

- 6 Palliative Radiation
- 7 Selecting Modalities
- 8 Treatment Planning in Palliative Radiotherapy
- 9 Alternate Modalities for Palliation
- 10 Combining Radiation and Systemic Therapy
- 11 Considerations Involving Reirradiation

SECTION III

Foundations and Principles of Palliative Radiation by Body Site or Special Population

- 12 Palliative Radiotherapy in the Head and Neck
- 13 Palliative Thoracic Radiation
- 14 Palliative Radiotherapy in the Breast and Chest Wall
- 15 Palliative Radiotherapy for Gastrointestinal Malignancies
- 16 Palliative Radiotherapy for Gynecologic Malignancies
- 17 Palliative Radiotherapy in Pediatrics
- 18 Radiotherapeutic Palliation of Lymphoma
- 19 Radiotherapeutic Palliation of Bone Marrow Diseases—Leukemia and Multiple Myeloma
- 20 Palliative Radiotherapy in Bones
- 21 Palliative Radiotherapy in the Brain
- 22 Palliative Radiotherapy in the Spine
- 23 Palliative Radiotherapy in Oligometastases
- 24 Palliative Radiotherapy in the Older Adult

SECTION IV

Management of Symptoms and Treatment-Related Toxicities

- 25 General Symptom Overview: Importance of Side Effect Management, CINV, Anorexia, and Cachexia
- 26 Management of Pain
- 27 Management of Fatigue
- 28 Management of Skin Toxicity
- 29 Central Nervous System: Symptoms and Toxicities
- 30 Management of Symptoms and Treatment-Related Toxicities of Head and Neck Cancers
- 31 Chest and Thorax: Symptoms and Toxicities
- 32 Abdomen and Pelvis: Symptoms and Toxicities
- 33 Late Toxicities Management
- 34 Psychosocial and Spiritual Distress
