

1 Introduction

SECTION 1 Advanced Diagnostic Bronchoscopy Procedures

2 Linear Endobronchial Ultrasound

3 Radial Endobronchial Ultrasound

4 Electromagnetic Navigation Bronchoscopy

5 Transbronchial Cryobiopsy for Diffuse Lung Diseases

SECTION 2 Therapeutic Bronchoscopy Procedures

6 Rigid Bronchoscopy

7 Mechanical Debridement

8 Rapid Ablative Techniques

9 Delayed Ablation Techniques: Photodynamic Therapy and Cryotherapy

10 Stent Placement

11 The Endoscopic Application of Medication to the Airway

12 Bronchial Thermoplasty

13 Bronchoscopic Lung Volume Reduction

14 Multimodality Approach to Malignant Airway Obstruction

15 Multimodality Approach to Benign Central Airway Obstruction

SECTION 3 Pleural Disease

16 Chest Tubes and Indwelling Pleural Catheters

17 Medical Thoracoscopy

SECTION 4 Additional IP Topics

18 Percutaneous Tracheostomy

19 How to Start an Interventional Pulmonology Program
