

1. *Computer-Assisted Spine Surgery—A New Era of Innovation*
  2. *Navigation in Occipital and Cervical Spine Surgery*
  3. *Navigation in Spine Trauma*
  4. *Navigated Spinal Deformity Correction*
  5. *Navigation of Tumor and Metastatic Lesions in the Thoracolumbar Spine*
  6. *Navigated Oblique Lumbar Interbody Fusion*
  7. *Navigation in Non-Instrumented Spine Surgery*
  8. *Robotic-Assisted Correction of Adult Spinal Deformity*
  9. *Robotic-Assisted Percutaneous Fixation*
  10. *Robotics in Spine Surgery: Beyond Pedicle Screw Placement*
  11. *Traumatic Spinal Injury and Robotic Reconstruction*
  12. *Cost-Effectiveness of Robotic and Navigation Systems*
  13. *Virtual and Augmented Reality in Spine Surgery*
  14. *Use of Activity Monitors in Enhancing Spine Surgery*
  15. *Artificial Intelligence and Machine Learning in Spine Surgery*
  16. *Databases, Study Groups, and Evidence in Robotic Spine Surgery*
  17. *Combinatorial Technologies Leveraging Robotics in Spine Surgery*
