

VOLUME ONE

Part I: Foundations of Sonography

1. Foundations of Clinical Sonography
2. Essentials of Patient Care for the Sonographer
3. Ergonomics and Musculoskeletal Issues in Sonography
4. Introduction to Anatomical Relationships in the Abdominal-Pelvic Cavity
5. Comparative Sectional Anatomy of the Abdominal-Pelvic Cavity
6. Basic Ultrasound: Scanning Techniques, Terminology & Tips
7. Artifacts in General Ultrasound Images

PART II: Abdomen

8. Vascular System
9. Liver
10. Gallbladder and the Biliary System
11. Spleen
12. Pancreas
13. Gastrointestinal Tract
14. Peritoneal Cavity and Abdominal Wall
15. Urinary System
16. Retroperitoneum
17. Ultrasound Contrast Agents in the Abdomen
18. Ultrasound-Guided Interventional Techniques
19. Emergent Ultrasound Procedures
20. Sonographic Techniques in the Transplant Patient

PART III: Superficial Structures

21. The Breast
22. The Thyroid and Parathyroid Glands
23. The Scrotum
24. The Musculoskeletal System

PART IV: Pediatrics

25. Neonatal & Pediatric Abdomen
26. Neonatal and Pediatric Adrenal & Urinary System
27. Neonatal & Infant Head
28. Infant & Pediatric Hip
29. Neonatal & Infant Spine

VOLUME TWO

PART V: The Thoracic Cavity

30. Anatomic and Physiologic Relationships within the Thoracic Cavity
31. Hemodynamics for the Sonographer
32. Introduction to Echocardiographic Techniques, Terminology & Tips
33. Clinical Applications of Echocardiography:
34. Clinical Applications of Echocardiography
35. Fetal Echocardiography: Beyond the Four Chambers
36. Fetal Echocardiography: Congenital Heart Disease

Part VI: Cerebrovascular

37. Extracranial Cerebrovascular Evaluation
38. Intracranial Cerebrovascular Evaluation
39. Peripheral Arterial Evaluation
40. Peripheral Venous Evaluation

PART VII: Gynecology

41. Normal Anatomy and Physiology of the Female Pelvis
42. Sonographic Evaluation of the Female Pelvis
43. Pathology of the Uterus
44. Pathology of the Ovaries
45. Pathology of the Adnexa
46. The Role of Sonography in Female Infertility

PART VIII: Obstetrics

47. The Role of Sonography in Obstetrics
48. Clinical Ethics for Obstetric Sonography
49. The Normal First Trimester
50. First-Trimester Complications
51. Sonography of the Second and Third Trimesters
52. Obstetric Measurements and Gestational Age
53. Fetal Growth Assessment by Sonography
54. Sonography and High-Risk Pregnancy
55. Prenatal Diagnosis of Congenital Abnormalities
56. The Placenta
57. The Umbilical Cord
58. Amniotic Fluid, Fetal Membranes, and Fetal Hydrops
59. The Fetal Face and Neck
60. The Fetal Neural Axis
61. The Fetal Thorax
62. The Fetal Anterior Abdominal Wall
63. The Fetal Abdomen
64. The Fetal Urogenital System
65. The Fetal Skeleton
