

## **Section I – Coronary Interventions**

*1 The Basics of Percutaneous Coronary Interventions*

*2 Vascular Access*

*3 Interventional Pharmacology*

*4 Guide Catheters, Guide Extenders, Guidewires, Balloons, and Stents*

*5 Intravascular Lesion Assessment: Physiology and Imaging*

*6 Adjunctive Tools: Atherectomy Devices, Laser, Thrombectomy*

*7 Bifurcation PCI*

*8 Chronic Total Occlusion Interventions*

*9 PCI in STEMI, NSTEMI, and Shock*

*10 PCI With Left Ventricular Hemodynamic Support*

*11 Coils, Plugs, Covered Stents, and Snares*

*12 Complications of Percutaneous Coronary Interventions*

## **Section II – Noncoronary Vascular Intervention**

*13 Vascular Access for Noncardiac Procedures*

*14 Guides, Wires, Balloons, and Stents for Noncoronary Interventions*

*15 Iliofemoral Peripheral Vascular Intervention*

*16 Aortic, Renal, Subclavian, and Carotid Interventions*

*17 Overview of Structural Heart Disease Interventions*

**Index**
