

Section I Preoperative Considerations

- 1. Patient Considerations: Comorbidities and Optimization*
- 2. Modify What's Modifiable: Smoking, Obesity, Opioid Dependence, and Nutritional Deficiencies*
- 3. Optimizing Important Comorbidities: Diabetes, Rheumatoid Arthritis, Peripheral Vascular Disease, and Cardiac Disease*
- 4. Assessment of Surgical Difficulty*
- 5. Preoperative Planning From Medical Issues to Implants*

Section II Issues and Considerations on the Day of Surgery

- 6. Setting Up an Outpatient or Same-Day Discharge Total Knee Arthroplasty (TKA) Program*
- 7. Surgical Procedure*
- 8. Bone-Cutting Technique*
- 9. TKA Balancing*
- 10. New Technology and Surgical Technique in TKA*
- 11. Cement Technique*

Section III Postoperative TKA Considerations

- 12. Avoiding Peri- and Postoperative Management After Total Knee Arthroplasty*
- 13. Complications of Total Knee Arthroplasty and Evidence Basis for Outcomes of Knee Arthroplasty*
