

Preface vii

Acknowledgments viii

SECTION I

Presurgical Evaluation and

Imaging 1

Chapter 1

*Presurgical Evaluation and Decision-
Making 2*

SECTION II

Surgical Technology and

Techniques 17

Chapter 2

*Surgical Systems and Tools, and
Operating Room Organization 18*

Chapter 3

*The Alcon Constellation Vision
System 33*

Chapter 4

Visualization and Illumination 38

Chapter 5

*3D Visualization for Vitreoretinal
Surgery 42*

Chapter 6

Endoscopy and Intraoperative OCT 45

Chapter 7

*Anesthesia Considerations for
Vitreoretinal Surgery 49*

Chapter 8

*General Posterior Segment
Techniques 54*

Chapter 9

Endocyclophotocoagulation 85

Chapter 10

*Combined Phacoemulsification and
Vitreotomy 88*

Chapter 11

*Vitreotomy Techniques and Technology
for Anterior Segment Problems 90*

SECTION III

In-Office Procedures 113

Chapter 12

In-Office Procedures 114

SECTION IV

Disease-Specific

Management 119

Chapter 13

*Laser Treatment of Retinal Breaks and
Laser Delimiting 120*

Chapter 14

Scleral Buckling 123

Chapter 15

Vitreotomy for Retinal Detachment 127

ContentsChapter 16

Giant Breaks 133

Chapter 17

Proliferative Vitreoretinopathy 139

Chapter 18

*Epimacular Membranes, Vitreomacular
Traction Syndrome, Macular Schisis 151*

Chapter 19

Macular Holes 157

Chapter 20

Diabetic Retinopathy 167

Chapter 21

*Management of Retinal Vein
Occlusions 185*
Chapter 22
*Surgical Management of Choroidal
Neovascular Membranes 187*
Chapter 23
Trauma 194
Chapter 24
Endophthalmitis 205
Chapter 25
Vitreotomy for Uveitis 210
Chapter 26
Retinopathy of Prematurity 215
Chapter 27
*Pediatric Traction Retinal
Detachments 221*
Chapter 28
Inadvertent Ocular Penetration 223
Chapter 29
*Management of Suprachoroidal
Hemorrhage 225*
Chapter 30
Surgical Self-Education 228
Index 231
